Department of Information Technology

M. Tech (SE)

Program Specific Outcomes

On successful completion of the program, the graduates of M.Tech (SE) program will be able to:

PSO1   Apply the knowledge of computer science and software engineering to provide solutions to real world problems

PSO2   Analyze, design, develop, deploy and maintain real time software systems and solutions

PSO3   Conduct investigations to identify research gaps and address complex engineering problems in software engineering domain.

PSO4   Apply appropriate techniques, use modern programming languages, tools and packages for quality software development by thorough understanding of needs under given constraints.
