Communication Systems (CMS)

(For the batches admitted from 2019-2020)

CHOICE BASED CREDIT SYSTEM

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(AUTONOMOUS)

**(Affiliated to JNTU Anantapur, Approved by AICTE
Programs Accredited by NBA; NAAC with 'A' grade)
Sree Sainath Nagar, A.Rangampet, Near Tirupati - 517 102.A.P.**

VISION

To be one of the Nation's premier Engineering Colleges by achieving the highest order of excellence in Teaching and Research.

MISSION

- To foster intellectual curiosity, pursuit and dissemination of knowledge.
- To explore students' potential through academic freedom and integrity.
- To promote technical mastery and nurture skilled professionals to face competition in ever increasing complex world.

QUALITY POLICY

Sree Vidyanikethan Engineering College strives to establish a system of Quality Assurance to continuously address, monitor and evaluate the quality of education offered to students, thus promoting effective teaching processes for the benefit of students and making the College a Centre of Excellence for Engineering and Technological studies.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

VISION

To be a center of excellence in Electronics and Communication Engineering through teaching and research producing high quality engineering professionals with values and ethics to meet local and global demands.

MISSION

- The Department of Electronics and Communication Engineering is established with the cause of creating competent professionals to work in multicultural and multidisciplinary environments.

- Imparting knowledge through contemporary curriculum and striving for development of students with diverse background.

- Inspiring students and faculty members for innovative research through constant interaction with research organizations and industry to meet societal needs.

- Developing skills for enhancing employability of students through comprehensive training process.

- Imbibing ethics and values in students for effective engineering practice.

DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING

<u>M. Tech. (Communication Systems)</u>

PROGRAM EDUCATIONAL OBJECTIVES

After few years of graduation, the graduates of M. Tech. (Communication Systems) Program would have

PEO1. Enrolled or completed research studies in the core or allied areas of communication systems.

PEO2. Successful entrepreneurial or technical career in the core or allied areas of communication systems.

PEO3. Continued to learn and to adapt to the world of constantly evolving technologies in the core or allied areas of communication systems.

PROGRAM OUTCOMES

On successful completion of the Program, the graduates of M. Tech. (CMS) will be able to:

PO1. Demonstrate mastery of knowledge in Communication Systems and other allied areas of the program.

PO2. Design and develop systems for communications and signal processing applications.

PO3. Select and apply appropriate modern tools, techniques and resources to provide engineering solutions in Communications and allied areas.

PO4. Independently carry out research to deliver solutions for complex problems in Communication Systems.

PO5. Communicate effectively in written and oral formats.

PO6. Ability to continuously engage in life-long learning to enhance knowledge and competence.

The Challenge of Change

"Mastery of change is in fact the challenge of moving human attention from an old state to a new state. Leaders can shift attention at the right time and to the right place. The real crisis of our times is the crisis of attention. Those who lead are the ones who can hold your attention and move it in a purposeful way. Transformation is nothing but a shift in attention from one form to another. The form of a beautiful butterfly breaks free from a crawling caterpillar. If you pay enough attention, you would be able to see how the butterfly hides within the caterpillar. The leader points out a butterfly when the follower sees only a caterpillar".

- Debashis Chatterjee

SREE VIDYANIKETHAN ENGINEERING COLLEGE
(AUTONOMOUS)
(Affiliated to J.N.T. University Anantapur, Ananthapuramu)

ACADEMIC REGULATIONS
(SVEC-19)

CHOICE BASED CREDIT SYSTEM

M. Tech. Regular Two Year Degree Program
(For the batches admitted from the academic year 2019-2020)

For pursuing Two year degree program of study in Master of Technology (M.Tech) offered by Sree Vidyanikethan Engineering College under Autonomous status and herein after referred to as SVEC:

1. **Applicability:** All the rules specified herein, approved by the Academic Council, shall be in force and applicable to students admitted from the academic year 2019-2020 onwards. Any reference to "College" in these rules and regulations stands for SVEC.

2. **Extent:** All the rules and regulations, specified hereinafter shall be read as a whole for the purpose of interpretation and as and when a doubt arises, the interpretation of the Chairman, Academic Council is final. It shall be ratified by Academic Council in the forth coming meeting. As per the requirements of statutory bodies, Principal, SVEC shall be the Chairman, Academic Council.

3. **Admission** :

3.1. **Admission into the Two Year M. Tech. Degree Program:**

3.1.1. **Eligibility:**

A candidate seeking admission into the two year M. Tech Degree Program should have

(i)   Passed B.Tech/B.E or equivalent Program recognized by JNTUA, Ananthapuramu, for admission as per the guidelines of Andhra Pradesh State Council of Higher Education (APSCHE).

(ii) A minimum percentage of marks in the qualifying degree as prescribed by the AICTE / UGC or Government at the time of admission.

(iii) Rank/score secured in the PGECET/GATE examination conducted by APSCHE/ MHRD for allotment of a seat by the convener PGECET, for admission.

3.1.2. **Admission Procedure**:

Admissions are made into the two year M.Tech. Degree Program as per the stipulations of APSCHE, Government of Andhra Pradesh:

(a) By the Convener, PGECET (for Category–A Seats)

(b) By the Management (for Category-B Seats).

4. Programs of study offered leading to the award of M.Tech. Degree and Eligibility:

Following are the two year M.Tech degree Programs of study with specializations, offered by the departments in SVEC leading to the award of M.Tech. degree and the qualifying degree eligible for admission:

Name of the M.Tech specialization	Offered by the Department	Qualifying Degree / Branch eligible for Admission
Electrical Power Systems	EEE	BE/ B.Tech / AMIE in Electrical & Electronics Engineering / Electrical Engineering or equivalent
Power Electronics and Drives		
Digital Electronics and Communication Systems	ECE	BE / B.Tech in ECE / AMIE in ECE, AMIE (Electronics & Telecommunication Engineering) / AMIETE (Electronics & Telematics Engineering)/ Electronics & Computer Engineering/ Electronics/ Electronics & Telematics or equivalent
Communication Systems		
VLSI		BE / B.Tech / AMIE in ECE, / EEE / CSE / Electronics & Computer Engineering / ETE / IT / CSIT / Electronics and Control Engineering / Instrumentation Engineering / Instrumentation Technology / EIE / Electronics Engineering / Bio-Medical Engineering / AMIETE (Electronics & Telematics Engineering)/ Electronics or equivalent
Computer Science	CSE	BE / B.Tech / AMIE in CSE / CSIT / IT / CSSE , M.Sc. (Computer Science), M.Sc. (Information Systems), M. Sc. (Information Technology), MCA or equivalent.
Computer Networks and Information Security		
Software Engineering	IT	

5. Duration of the Program:

5.1 Minimum Duration:

The program will extend over a period of two years leading to award of the Degree of Master of Technology (M.Tech) by JNTUA University, Ananthapuramu. The two academic years are divided into four semesters with two semesters per year. Each semester shall consist of 21 weeks (≥90 working days) having – 'Continuous Internal Evaluation (CIE)' and 'Semester End Examination (SEE)'. Choice Based Credit System (CBCS) and Credit Based Semester System (CBSS) as suggested by UGC, and Curriculum/Course Structure as suggested by AICTE are followed.

5.2 Maximum Duration:

The student shall complete all the passing requirements of the M.Tech degree program within a maximum duration of 04 years excluding the Gap year. This duration is reckoned from the commencement of the semester into which the student is first admitted to the program.

6. **Course Structure:**

Each M.Tech Program of study shall comprise of:

- Professional Core courses:

  The list of professional core courses shall be chosen as per the suggestions of the experts, to impart knowledge and skills needed in the concerned specialization of study.

- Professional Elective courses:

  Professional elective courses shall be offered to the students to diversify their spectrum of knowledge and skills. The elective courses can be chosen based on the interest of the student to broaden his individual knowledge and skills.

- Audit Courses: Audit courses shall be offered to the students to diversify their knowledge.

- Projects (Internship, Project work)

7. **Credit System:** All Courses are to be registered by a student in a Semester to earn Credits. Credits are assigned based on the following norms given in Table 1.

Table 1

Course	Periods/Week	Credits
Theory	01	01
Practical	01	0.5
Internship	--	02
Project Work Phase-I	--	10
Project Work Phase-II	--	16

All Courses are to be registered by a student in a Semester to earn Credits. Credits shall be assigned to each Course in an L: T: P: C (Lecture Hours: Tutorial Hours: Practical Hours: Credits) Structure, based on the following general pattern.

- **Theory Courses:** One Lecture Hour (L) per week in a semester: 01 Credit
- **Practical Courses:** One Practical Hour (P) Per week in a semester: 0.5 Credit
- **Tutorial:** One Tutorial Hour (T) Per week in a semester: 01 Credit
- **Audit Courses:** No **CREDIT** is awarded.
- **Open Elective** (MOOC): 03 Credits

For courses like Internship and Project work, where formal contact periods are not specified, credits are assigned based on the complexity of the work to be carried out. Other student activities like NCC, NSS, Sports, Study Tour, and Guest Lecture etc. shall not carry Credits.

The two year curriculum of any M. Tech Degree Program of study shall have total of **68** credits.

8. Choice Based Credit System (CBCS):

8.1 Choice Based Credit System (CBCS) is introduced in line with UGC guidelines in order to promote:

- Student centered learning
- Students to learn courses of their choice
- Interdisciplinary learning

A Student has a choice of registering for courses comprising program core, Program electives, Open elective through MOOC course.

9. Course Enrollment and Registration

9.1 Each student, on admission shall be assigned to a Faculty Advisor (Mentor) who shall advice and counsel the student about the details of the academic program and the choice of courses considering the student's academic background and career objectives.

9.2 The enrollment of courses in I-Semester will commence on the day of admission. If the student wishes, the student may drop or add courses (vide clause 8) within **three** days before commencement of I-Semester class work and complete the registration process. The student shall enroll for the courses with the help of Faculty Advisor (Mentor). The enrollment of courses in II-Semester will commence 10 days prior to the last instructional day of the I-Semester and complete the registration process for all the remaining theory courses as per program course structure, duly authorized by the Chairman, Board of studies of concerned department.

9.3 If any student fails to register the courses in a semester, he shall undergo the courses as per the program course structure.

9.4 After registering for a course, a student shall attend the classes, satisfy the attendance requirements, earn Continuous Assessment marks and appear for the Semester-end Examinations.

9.5 No elective course shall be offered by a Department unless a minimum of 08 students register for the course.

10. OPEN ELECTIVE (MOOC):

OPEN ELECTIVE (MOOC) is an online course aimed at unlimited participation and open access via the web.

10.1 A Student is offered an Open Elective (MOOC), in the M.Tech II-Semester, and pursued through Massive Open Online Course (MOOC) platforms.

10.2 The student shall confirm registration by enrolling the course within 10 days prior to the last instructional day of the M.Tech I-Semester along with other courses.

10.3 The list of courses along with MOOC service providers shall be identified by the Chairman, BOS, and Head of the Department. The identified Open Elective (MOOC) courses are to be approved by the Chairman, Academic Council.

10.4 The HOD shall appoint one faculty member as **mentor** during the M.Tech I-Semester for each Open Elective Course registered through MOOC.

10.5 There shall be ONLY semester-end examination for open elective (MOOC) course. It shall be evaluated by the department through ONLINE with 50 multiple choice questions for 100 marks. The department shall prepare the Question Bank for Conducting the ONLINE Open Elective (MOOC) Examination.

11. Break of Study from a Program (Gap Year)

11.1 A student is permitted to go on break of study for a maximum period of one year.

11.2 The student shall apply for break of study in advance, in any case, not later than the last date of the first assessment period in a semester. The gap year concept is introduced for start-up (or) incubation of an idea, National/International Internships, professional Volunteering and chronic illness. The application downloaded from the website and duly filled in by the student shall be submitted to the Principal through the Head of the department. A committee shall be appointed by the Principal in this regard. Based on the recommendations of the committee, Principal shall decide whether to permit the student to avail the gap year or not.

11.3 The students permitted to rejoin the program after break of study shall be governed by the Curriculum and Regulations in force at the time of rejoining.

The students rejoining in new regulations shall apply to the Principal in the prescribed format through Head of the Department, at the beginning of the readmitted semester for registering additional/equivalent courses to comply with the curriculum in-force.

11.4 The one year period of break of study shall not be counted for the maximum period for the award of the degree (i.e 05 years shall be the maximum period for the award of degree for the students availing Gap Year).

11.5 If a student has not reported to the college after completion of approved period of break of study without prior intimation, he is deemed to be detained in that semester. Such students are eligible for readmission into the semester when offered next.

12. **Examination System:** All components in any Program of study shall be evaluated through internal evaluation and/or an external evaluation conducted as semester-end examination.

12.1. Distribution of Marks:

Sl. No.	Course	Marks	Examination and Evaluation	Scheme of examination
1.	Theory	60	Semester-end examination of 3 hours duration (External evaluation)	The examination question paper in theory courses shall be for a maximum of 60 marks. The question paper shall be of descriptive type with 10 questions each of 12 marks, taken two from each unit. Each unit will have internal choice and 5 questions shall be answered, one from each unit.
		40	Mid-term Examination of 2 hours duration (Internal evaluation).	Two mid-term examinations each for 40 marks are to be conducted. For a total of 40 marks, 80% of better one of the two and 20% of the other one are added and finalized. **Mid-I:** After first spell of instruction (I & II Units). **Mid-II**: After second spell of instruction (III, IV & V Units). The question paper shall be of descriptive type with 5 essay type questions each of 10 marks, out of which 3 are to be answered and evaluated for 30 marks. There shall be also 5 short answer questions each of 2 marks, all are to be answered and evaluated for 10 marks.

Sl. No.	Course	Marks	Examination and Evaluation		Scheme of examination
2	Laboratory	50	50	Semester-end Lab Examination for 3 hours duration (External evaluation)	The examination will be conducted by the faculty member handling the laboratory (Examiner-2) and another faculty member (Examiner-1) appointed by the Chief Controller of examinations.
			30	Day-to-Day evaluation for Performance in laboratory experiments and Record. (Internal evaluation).	Two laboratory examinations, which include Day-to-Day evaluation and Practical test, each for 50 marks are to be evaluated by the faculty members handling the laboratory. For a total of 50 marks 80% of better one of the two and 20% of the other one are added and finalized. **Laboratory examination-I:** Shall be conducted just before FIRST mid-term examinations. **Laboratory examination-II:** Shall be conducted just before SECOND mid-term examinations.
			20	Practical test (Internal evaluation).	
3	Audit Courses	--	--		As detailed in 12.2.1
4	Internship	100	Semester-end Examination		100 marks are allotted for Internship During semester-end evaluation by the Department Evaluation Committee (**DEC**) as given in 12.2.2.
5	Open Elective (MOOC)	100	Semester-end Examination		The evaluation shall be done by the department through ONLINE with 50 multiple choice questions.
6	Project Work Phase-I	100	50	Internal evaluation	Continuous evaluation shall be done by the Project Evaluation Committee (**PEC)** as given in 12.2.3.1
			50	Semester-end evaluation	Project Work Viva-Voce Examination shall be conducted by a Committee at the end of the semester as given in 12.2.3.1
7	Project Work Phase-II	300	150	Internal evaluation	Continuous evaluation shall be done by the Project Evaluation Committee (**PEC)** as given in 12.2.3.2
			150	Semester-end evaluation	Project Work Viva-Voce Examination shall be conducted by a Committee at the end of the semester as given in 12.2.3.2

12.2 Audit Course/ Internship and Project Work Evaluation:

12.2.1. Audit Course:

Audit courses carry "ZERO" credits. There shall be **NO Internal Examination** and **Semester-end examination**. However, ATTENDANCE in Audit courses shall be considered while calculating aggregate attendance in a semester. The student should study all the audit courses, and it will be indicated in the GRADE Sheet.

12.2.2. Internship:

The student shall undergo **Internship** in an Industry/National Laboratories/Academic Institutions relevant to the respective branch of study. This course is to be registered during II-Semester and taken up during the summer vacation after completion of the II-Semester, for a period of FOUR weeks duration. The Industry training/Internship shall be

submitted in a Report form, and a presentation of the same shall be made before a Department Evaluation Committee (DEC) and it should be evaluated for 100 marks. The DEC shall consist of the Head of the Department, the concerned Supervisor and a Senior Faculty Member of the Department. The DEC is constituted by the Chief Controller of Examinations on the recommendations of the Head of the Department. There shall be NO internal marks for Internship. The Internship shall be evaluated at the end of the III-Semester.

12.2.3. **Project Work:**

12.2.3.1. The Project Evaluation Committee (PEC) consisting of concerned supervisor and two senior faculty members shall monitor the progress of the project work of the student. The PEC is constituted by the Principal on the recommendations of the Head of the Department. Project Work Phase–I is to be completed in the III-Semester. A Student has to identify the topic of the Project Work, collect relevant Literature, preliminary data, implementation tools/ methodologies etc., and perform a critical study and analysis of the problem identified and submit a Report.

(i) **Internal Evaluation:** The Internal Evaluation of Project work Phase-I shall be made by the PEC on the basis of TWO project reviews on the topic of the project. Each review shall be conducted for a maximum of "50" marks. For a total of 50 marks, 80% of better one of the two and 20% of the other one are added and finalized.

(ii) **Semester-end Evaluation:** The semester-end Project Work Phase-I Viva-Voce examination shall be conducted by the concerned guide and a senior faculty member recommended by the Head of the Department and appointed by the Chief Controller of Examinations.

12.2.3.2 A student shall continue to undertake the Project Work Phase–II during theIV Semester by undertaking practical investigations, implementation, analysis of results, validation and report writing. The student shall submit a Project report at the end of the semester after approval of the PEC.

(i) **Internal Evaluation:** The Internal Evaluation of Project work Phase-II shall be made by the PEC by conducting TWO project reviews on the progress, presentations and quality of work. Each review shall be conducted for a maximum of "150" marks. For a total of 150 marks, 80% of better one of the two and 20% of the other one are added and finalized.

(ii)**Semester-end Evaluation:** A candidate shall be allowed to submit the dissertation on the recommendations of the PEC. Three copies of the dissertation certified in the prescribed format by the concerned Supervisor and HOD shall be submitted to the Department. One copy is to be submitted to the Chief Controller of Examinations and one copy to be sent to the examiner. The examiner shall be nominated by the Chief Controller of the Examinations from the panel of THREE examiners submitted by the Department for a maximum of 05 students at a time for adjudication.

If the report of the examiner is favorable, Semester-end Project Work Phase-II Viva-Voce Examination shall be conducted by a Committee consisting of External examiner (nominated by the Chief Controller of Examinations), HOD and concerned Supervisor at the end of the IV Semester.

If the report of the examiner is not favorable, the dissertation should be revised and resubmitted after a minimum period of three months.

12.2.3.3   The students who fail in Project work Phase-I (or) Phase-II Viva-Voce examination shall have to re-appear for the Viva-Voce examination after three months. Extension of time for completing the project is to be obtained from the Chairman, Academic Council, SVEC (Autonomous).

12.2.3.4   Change of the project work topic shall be permitted only in Project Work Phase-I, within FOUR weeks after commencement of the III-Semester with the approval of the PEC.

12.3. Eligibility to appear for the semester-end examination:

12.3.1   A student shall be eligible to appear for semester-end examinations if he acquires a minimum of 75% of attendance in aggregate of all the courses in a semester.

12.3.2   Condonation of shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester may be granted by the College Academic Committee.

12.3.3   Shortage of attendance below 65% in aggregate shall in no case be condoned.

12.3.4   Students whose shortage of attendance is not condoned in any semester shall not be eligible to take their semester-end examination and their registration shall stand cancelled.

12.3.5   A student shall not be promoted to the next semester unless he satisfies the attendance requirements of the semester, as applicable. The student may seek readmission for the semester when offered next. He will not be allowed to register for the courses of the semester while he is in detention.

12.3.6   A stipulated fee shall be payable to the college towards condonation of shortage of attendance.

12.4. Evaluation:

Following procedure governs the evaluation.

12.4.1.   Marks for components evaluated internally by the faculty should be submitted to the Controller of Examinations one week before the commencement of the semester-end examinations. The marks for the internal evaluation components shall be added to the external evaluation marks secured in the semester-end examinations, to arrive at total marks for any course in that semester.

12.4.2.   Performance in all the courses is tabulated course-wise and shall be scrutinized by the Results Committee and moderation is applied if needed and course-wise marks are finalized. Total marks obtained in each course are converted into letter grades.

12.4.3. Student-wise tabulation shall be done and individual grade sheet shall be generated and issued.

12.5. Personal verification / Revaluation / Recounting:

Students shall be permitted for personal verification/request for recounting/ revaluation of the semester-end examination answer scripts within a stipulated period after payment of prescribed fee. After recounting or revaluation, records shall be updated with changes if any and the student shall be issued a revised grade sheet. If there are no changes, the student shall be intimated the same through a notice.

12.6. Supplementary Examination:

In addition to the regular semester-end examinations conducted, the College may also schedule and conduct supplementary examinations for all the courses of other semesters when feasible for the benefit of students. Such of the candidates writing supplementary examinations may have to write more than one examination per day.

13. Re-Registration for Improvement of Internal Marks:

Following are the conditions to avail the benefit for improvement of internal evaluation marks.

13.1 The student should have completed all the course work and obtained examinations results for I, II and III semesters.

13.2 If the student has **failed** in the examination due to internal evaluation marks secured being less than 50%, he shall be given one chance for a maximum of 3 theory courses for improvement of internal evaluation marks.

13.3 The candidate has to register for the chosen courses and fulfill the academic requirements.

13.4 For each course, the candidate has to pay a fee equivalent to one third of the semester tuition fee and the amount is to be remitted in the form of D.D/ Challan in favour of the Principal, Sree Vidyanikethan Engineering College payable at Tirupati along with the requisition through the concerned Head of the Department.

13.5 If a student avails the benefit for Improvement of Internal evaluation marks, the internal evaluation marks as well as the semester-end examinations marks secured in the previous attempt(s) for the re-registered courses stands cancelled.

14. Academic Requirements for Completion of M.Tech degree Program:

The following academic requirements have to be satisfied in addition to the attendance requirements for completion of M.Tech degree Program.

14.1 A student shall be deemed to have satisfied the minimum academic requirements for each theory, laboratory and project work, if he secures not less than 40% of marks in the semester-end examination and a minimum of 50% of marks in the sum total of the internal evaluation and semester-end examination taken together. For the *internship* and *open elective*

(MOOC) courses, he should secure not less than 50% of marks in the semester-end examination.

14.2 A student shall register for all the 68credits and earn all the 68 credits. Marks obtained in the 68credits shall be considered for the calculation of the DIVISION based on CGPA.

14.3 A student who fails to earn 68credits as indicated in the curriculum within **four** academic years from the year of his admission shall forfeit his seat in M.Tech. Program and his admission stands cancelled.

15. **Transitory Regulations:**

Students who got detained for want of attendance (**or**) who have not fulfilled academic requirements (**or**) who have failed after having undergone the Program in earlier regulations (**or**) who have discontinued and wish to continue the Program are eligible for admission into the unfinished semester from the date of commencement of class work with the same (**or**) equivalent courses as and when courses are offered and they will be in the academic regulations into which they are presently readmitted.

A regular student has to satisfy all the eligibility requirements within the maximum stipulated period of **four years** for the award of M.Tech Degree.

16. **Grades, Grade Point Average and Cumulative Grade Point Average:**

16.1. **Grade System:** After all the components and sub-components of any course (including laboratory courses) are evaluated, the final total marks obtained shall be converted to letter grades on a "**10 point scale**" as described below.

Grades conversion and Grade points allotted

% of Marks obtained	Grade	Description of Grade	Grade Points (GP)
≥ 95	O	Outstanding	10
≥ 85 to < 95	S	Superior	9
≥ 75 to < 85	A	Excellent	8
≥ 65 to < 75	B	Very Good	7
≥ 55 to < 65	C	Good	6
≥ 50 to <55	D	Pass	5
< 50	F	Fail	0
Not Appeared	N	Absent	0

Pass Marks:

A student shall be declared to have passed theory course, laboratory course and project work if he secures minimum of 40% marks in Semester-end examination, and a minimum of 50% marks in the sum total of internal evaluation and Semester-end examination taken together. For the seminar, he shall be declared to have passed if he secures minimum of 50% of marks in the semester-end examinations. Otherwise he shall be awarded fail grade - **F** in such a course irrespective of internal marks. **F** is considered as a fail grade indicating that the student has to

pass the semester-end examination in that course in future and obtain a grade other than **F** and **N** for passing the course.

16.2 Semester Grade Point Average (SGPA): SGPA shall be calculated as given below on a "10 point scale" as an index of the student's performance:

$$SGPA = \frac{\sum (C \; X \; GP)}{\sum C}$$

Where "C" denotes the "credits" assigned to the courses undertaken in that semester and "GP" denotes the "grade points" earned by the student in the respective courses.

Note: SGPA is calculated only for the candidates who appeared in the semester-end regular examinations in a particular semester:

16.3. Cumulative Grade Point Average (CGPA):

The CGPA shall be calculated for a candidate appeared in the Semester-end examinations for all the courses (including Regular & Supplementary) till that semester. The CGPA will be displayed in the Grade sheet of the Regular Semester-end examinations and also in the consolidated Grade Sheet issued at the end of the program. The CGPA is computed on a 10 point scale as given below:

$$CGPA = \frac{\sum (C \; X \; GP)}{\sum C}$$

where C denotes the credits assigned to courses undertaken up to the end of the Program and GP denotes the grade points earned by the student in the respective courses.

17.   Grade Sheet: A grade sheet (Marks Memorandum) shall be issued to each student on his performance in all courses registered in that semester indicating the **SGPA and CGPA.**

18.   Consolidated Grade Sheet: After successful completion of the entire Program of study, a Consolidated Grade Sheet indicating performance of all academic years shall be issued as a final record. Duplicate Consolidated Grade Sheet will also be issued, if required, after payment of requisite fee.

19.   Award of Degree: The Degree shall be conferred and awarded by Jawaharlal Nehru Technological University Anantapur, Ananthapuramu on the recommendations of the Chairman, Academic Council, SVEC (Autonomous).

19.1.   Eligibility: A student shall be eligible for the award of M.Tech Degree if he fulfills all the following conditions:

- Registered and successfully completed all the components prescribed in the Program of study to which he is admitted.

- Successfully acquired the minimum required credits as specified in the curriculum corresponding to the Program of study within the stipulated time.

- Obtained CGPA greater than or equal to 5.0 (Minimum requirement for declaring as passed).

- Has NO DUES to the College, Hostel, Library etc. and to any other amenities provided by the College.

- No disciplinary action is pending against him.

19.2. Award of Division: Declaration of division is based on CGPA.

Awarding of Division

CGPA	Division
> = 7.0	First Class with Distinction
> = 6.0 and < 7.0	First Class
> = 5.0 and < 6.0	Second Class

20. Additional Academic Regulations:

20.1 A student may appear for any number of supplementary examinations within the stipulated time to fulfill regulatory requirements for award of the degree.

20.2 In case of malpractice/improper conduct during the examinations, guidelines shall be followed as shown in the **ANNEXURE-I**.

20.3 When a student is absent for any examination (Mid-term or Semester-end) he shall be awarded **zero** marks in that component (course) and grading will be done accordingly.

20.4 When a component is cancelled as a penalty, he shall be awarded zero marks in that component.

21. Withholding of Results:

If the candidate has not paid dues to the College/University (or) if any case of indiscipline is pending against him, the result of the candidate shall be withheld and he will not be allowed/promoted to the next higher semester

22. Amendments to regulations:

The Academic Council of SVEC (Autonomous) reserves the right to revise, amend, or change the Regulations, Scheme of Examinations, and / or Syllabi or any other policy relevant to the needs of the society or industrial requirements etc., with the recommendations of the concerned Board(s) of Studies.

23. General:

The words such as "he", "him", "his" and "himself" shall be understood to include all students irrespective of gender connotation.

Note: *Failure to read and understand the regulations is not an excuse.*

ANNEXURE-I

GUIDELINES FOR DISCIPLINARY ACTION FOR MALPRACTICES / IMPROPER CONDUCT IN EXAMINATIONS

Rule No.	Nature of Malpractices/ Improper conduct	Punishment
	If the candidate:	
1. (a)	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the course of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the course of the examination)	Expulsion from the examination hall and cancellation of the performance in that course only.
(b)	Gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through cell phones with any candidate or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that course only of all the candidates involved. In case of an outsider, he will be handed over to the police and a case is registered against him.
2.	Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the course of the examination (theory or practical) in which the candidate is appearing.	Expulsion from the examination hall and cancellation of the performance in that course and all other courses the candidate has already appeared including practical examinations and project work and shall not be permitted to appear for the remaining examinations of the courses of that Semester. The Hall Ticket of the candidate is to be cancelled.
3.	Impersonates any other candidate in connection with the examination.	The candidate who has impersonated shall be expelled from examination hall. The candidate is also debarred for four consecutive semesters from class work and all Semester-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. The performance of the original candidate who has been impersonated, shall be cancelled in all the courses of the examination (including labs and project work) already appeared and shall not be allowed to appear for examinations of the remaining courses of that semester. The candidate is also debarred for four consecutive semesters from class work and all Semester-end examinations, if his involvement is established. Otherwise, The candidate is debarred for two consecutive semesters from class work and all Semester-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider, he will be handed over to the police and a case is registered against him.
4.	Smuggles in the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.	Expulsion from the examination hall and cancellation of performance in that course and all the other courses the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the courses of that semester. The candidate is also debarred for two consecutive semesters from class work and all Semester-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
5.	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award	Cancellation of the performance in that course only.

		pass marks.
6.	Refuses to obey the orders of the Chief Controller of Examinations/Controller of Examinations/any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the Controller of Examinations or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the Controller of Examinations, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the College campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.	In case of students of the college, they shall be expelled from examination halls and cancellation of their performance in that course and all other courses the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the courses of that semester. If the candidate physically assaults the invigilator/Controller of the Examinations, then the candidate is also debarred and forfeits his/her seat. In case of outsiders, they will be handed over to the police and a police case is registered against them.
7.	Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that course and all the other courses the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the courses of that semester. The candidate is also debarred for two consecutive semesters from class work and all Semester-end examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
8.	Possess any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that course and all other courses the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the courses of that semester. The candidate is also debarred and forfeits the seat.

Note: Whenever the performance of a student is cancelled in any course(s) due to Malpractice, he has to register for Semester-end Examinations in that course(s) consequently and has to fulfill all the norms required for the award of Degree.

40	60	100	3	-	-	3

PRE-REQUISITES: --

A Course on Digital Communications at UG Level**,** Review of random Variables and Processes

COURSE DESCRIPTION:

Band pass signals and systems; Digital modulation techniques; Design of optimum receivers; Generation and detection of spread spectrum signals.

COURSE OBJECTIVES:

CEO1: To impart knowledge on Characterizing and analyzing the Communication Signals and Systems, Digital modulation techniques and Communication over AWGN channels

CEO2: To design optimum Receivers for the Additive Gaussian Noise Channel and Solve the problems in Spread Spectrum Technique and Multichannel and Multicarrier Systems Digital Modulation Techniques;

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1 :   Demonstrate in-depth knowledge on response of systems for Band Pass, signal space and multidimensional representations of signals.

CO2 :   Analyze various digital Modulation Techniques to improve the performance of digital communication systems.

CO3 :   Analyze the performance of optimum receiver for Signals with Random Phase in AWGN Channel.

CO4 :   Apply Spread Spectrum techniques in Anti jamming Application, Low-Detectability Signal Transmission and Code Division Multiple Access.

CO5 :   Analyze the performance of Multichannel and Multicarrier systems.

DETAILED SYLLABUS:

Unit-I: Characterization of Communication Signals and Systems   (Hours: 09)
Representation of Band Pass Signals and Systems–Representation of Band Pass Signals, Representation of Linear Band-Pass System, Response of a Band-Pass System to a Band-Pass Signal. Signal Space Representations – Vector Space Concepts, Signal Space Concepts, Orthogonal Expansion of Signals. Representation of Digitally Modulated Signals – Memory Less Modulation Methods – PAM Signals, Phase Modulated Signals, QAM Signals, Multidimensional Signals, Orthogonal Multidimensional Signals.

Unit-II: Digital Modulation Techniques   (Hours: 09)
Digital Modulation – Factors that Influence the Choice of Digital Modulation, Bandwidth and Power Spectral Density of Digital Signals. Linear Modulation Techniques – BPSK, DPSK, QPSK, OQPSK, Π/4 QPSK. Constant Envelope Modulation Techniques – MSK, GMSK, Combined Linear and Constant Envelope Modulation Techniques – M-ary PSK, M-ary QAM.

Unit-III: Optimum Receivers for the Additive Gaussian Noise Channel

(Hours: 09)

Optimum Receiver for Signals corrupted by AWGN –Correlation demodulator, Matched Filter Demodulator, Optimum Detector. Performance of the Optimum Receiver for Memory Less Modulation – Probability of Error for Binary Modulation, M-ary Orthogonal Signals, M-ary PAM, M-ary PSK, QAM. Optimum Receiver for Signals with Random Phase in AWGN Channel – Optimum Receiver for Binary Signals, Optimum Receiver for M-ary Orthogonal Signals.

Unit-IV: Spread Spectrum Techniques **(Hours: 09)**

Introduction, Model of Spread Spectrum Digital Communication System, Direct Sequence Spread Spectrum Signals – Introduction, The Processing Gain and Jamming Margin. Applications of Direct Sequence Spread Spectrum Signals – Anti jamming Application, Low-Detectability Signal Transmission, Code Division Multiple Access. Generation of PN-Sequences, Frequency-Hopped Spread Spectrum Signals, Other Types of Spread Spectrum Signals. Detection of spread spectrum signals- Matched filter receiver.

Unit-V: Multichannel and Multicarrier Systems **(Hours: 09)**

Rayleigh and Rician channels, Multichannel Digital Communications in AWGN Channels; Binary Signals, M-ary Orthogonal Signals. Multicarrier Communications; Single Carrier verses Multicarrier Modulation, Capacity of a Non ideal Linear Filter Channel, OFDM, Modulation & Demodulation in an OFDM.

Total Hours: 45

M. Tech. - I Semester

(19MT13807) RF CIRCUIT DESIGN AND MICROWAVE DEVICES
(Common to CMS & DECS)

Int. Marks	Ext. Marks	Total Marks		L	T	P	C
40	60	100		3	-	-	3

PRE-REQUISITES:

Concept of Basic Electronics and Wave Theory at UG level

COURSE OBJECTIVES:

CEO1: To impart advanced knowledge in the fields of RF Circuits.
CEO2: To develop skills in analytical, problem solving, design and application skills in the broad area of RF circuit design.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1: Understand and apply the basic concepts of RF Electronics, analyze transmission lines, matching and biasing networks, and RF components, Design RF devices in Wireless Communications.
CO2: Realize, compare, and estimate problems in RF Passive and Active components as well as smart antenna techniques in the field of RF Circuits.
CO3: Analyze RF circuits and demonstrates use of Smith Chart for high frequency circuit design.
CO4: Apply techniques like MF-UHF for designing high-power microstrip circuits, directional couplers, transformers, composite and multilayer inductors, filters, combiners/dividers, and RFID systems in the field of wireless communication systems.
CO5: Analyze noise in RF devices like Oscillators, and synthesizers.

DETAILED SYLLABUS:

Unit-I: Introduction to RF Electronics (Hours: 09)
The Electromagnetic Spectrum, units and Physical Constants, Microwave bands, RF behavior of Passive components: Tuned resonant circuits, Vectors, Inductors and Capacitors. Voltage and Current in capacitor circuits, Tuned RF / IF Transformers.

Unit-II: Transmission Line Analysis (Hours: 12)
Examples of transmission lines, Transmission line equations and Biasing: Kirchoffs Voltage and current law representation, Traveling voltage and current waves, General Impedance definition, lossless transmission line model. Micro Strip Transmission Lines, Special Termination Conditions, sourced and Loaded Transmission Lines.
Single and Multiport Networks: The Smith Chart, Interconnectivity networks, Network properties and Applications, Scattering Parameters.

Unit-III: Microwave Components (Hours: 08)
Microwave resonators, Microwave filters, power dividers and directional couplers, Ferromagnetic devices and components.
Nonlinearity and Time Variance Inter-symbol interference, random process & noise, definition of sensitivity and dynamic range, conversion gain and distortion.

Unit-IV: Microwave Semiconductor Devices and Modeling   (Hours: 08)
PIN diode, Tunnel diodes, Varactor diode, Schottky diode, IMPATT and TRAPATT devices, transferred electron devices, Microwave BJTs, GaAs FETs, low noise and power GaAs FETs, MESFET, MOSFET, HEMT.

Unit-V: Oscillators and Mixers   (Hours: 08)
Oscillator basics, Low phase noise oscillator design, High frequency Oscillator configuration, LC Oscillators, VCOs, Crystal Oscillators, PLL Synthesizer, and Direct Digital Synthesizer.
RF Mixers: Basic characteristics of a mixer, Active mixers, Image Reject and Harmonic mixers, Frequency domain considerations.

Total Hours: 45

M. Tech. – I Semester
(19MT16101) DETECTION AND ESTIMATION OF SIGNALS

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	*3*	-	-	*3*

PRE-REQUISITES:

A Course on Probability and Stochastic Processes at UG Level**.**

COURSE DESCRIPTION:

Decision criteria for single and multiple observations; Estimation techniques; Properties of estimators; parameter Estimation.

COURSE OBJECTIVES:

CEO1: To gain advanced knowledge in detection and estimation of signals in the Presence of noise.
CEO2: To analyze, design, implement optimum filters and receivers in the fields of Communications and Radar systems.

COURSE OUTCOMES:

On successful completion of this course the students will be able to

CO1: Analyze various decision criteria to solve problems in evaluating probability of errors and develop optimum receivers.
CO2: Apply different Estimation techniques to obtain optimum solutions.
CO3: Analyze state estimation and statistical parameters to determine the performance of Communications and Radar Systems.

DETAILED SYLLABUS:

Unit-I: Detection Theory   **(Hours: 09)**
Binary Decisions: Single observation–Maximum-likelihood decision criterion, Neyman-Pearson criterion, Receiver operating characteristics, Probability-of-error criterion, Bayes risk criterion, Min-max criterion. Problem solving.

Unit-II: Binary Decisions: Multiple Observations   **(Hours: 09)**
Vector observations, the general Gaussian Problem, Waveform Observation in Additive Gaussian Noise, The Integrating Optimum Receiver, Matched Filter Receiver,Problem solving.

Unit-III: Estimation Theory   **(Hours: 10)**
Maximum-likelihood estimation, Bayes estimation criterion - Mean Square Error Criterion, Uniform Cost Function, Absolute-Value Cost Function. Linear minimum-Variance and Least Squares Method, Estimation in the presence of Gaussian noise - Linear observation, Non-linear estimation. Problem solving.

Unit-IV: Properties of Estimators   **(Hours: 08)**
Bias, Efficiency, Cramer-Rao bound, Asymptotic properties, Sensitivity and error analysis.

Unit–V: State Estimation & Statistical Estimation of Parameters   **(Hours: 09)**
State Estimation: Prediction, Kalman filter, Problem solving.
Statistical Estimation of Parameters: Concept of sufficient statistics, Exponential families of Distributions, Exponential families and Maximum likelihood estimation, uniformly minimum-variance unbiased estimation.

Total Hours: 45

M. Tech. - I Semester
(19MT13801) ADVANCED DIGITAL SIGNAL PROCESSING
(Common to CMS & DECS)
(Program Elective-1)

Int. Marks	Ext. Marks	Total Marks		L	T	P	C
40	60	100		3	-	-	3

PRE-REQUISITES:

Course on Digital Signal Processing at UG level

COURSE DESCRIPTION:

Digital filter banks; Parametric and Non-Parametric Power Spectrum Estimation methods; computationally efficient algorithms; Applications of DSP.

COURSE OBJECTIVES:

CEO1: To impart advanced knowledge in Digital Signal Processing and applications
CEO2: To develop skills in design, analysis, problem solving and research in Multirate Signal Processing, Linear prediction, Power Spectral Estimation and Communications.

COURSE OUTCOMES:

After successful completion of the course, student will be able to:

CO1: Analyze sampling rate conversion, various DSP algorithms and design digital Filter Banks to improve performance characteristics of digital systems in multidisciplinary environments like image processing, wireless communication, biomedical engineering, speech processing, video processing, etc
CO2: Realize, compare and estimate power spectrum using different Non-Parametric and Parametric Methods in the frequency analysis of systems.
CO3: Understand Linear Prediction, analyze Lattice Forward and Backward Predictors for Radar signal processing and Remote sensing.
CO4: Apply signal processing techniques in fields such as communications, speech processing, Image and video processing.

DETAILED SYLLABUS:

Unit-I: Multirate Filter Banks   **(Hours: 10)**
Decimation, Interpolation, Sampling rate conversion by a rational factor I/D, Multistage Implementation of sampling rate conversion. **Digital Filter Banks**: Two-Channel Quadrature-Mirror Filter Bank, Elimination of aliasing, condition for Perfect Reconstruction, Polyphase form of QMF bank, Linear phase FIR QMF bank, IIR QMF bank, Perfect Reconstruction Two-Channel FIR QMF Bank.

Unit-II: DSP Algorithms   **(Hours: 08)**
Fast DFT algorithms based on Index mapping, Sliding Discrete Fourier Transform, DFT Computation Over a narrow Frequency Band, Split Radix FFT, Linear filtering approach to Computation of DFT using Chirp Z-Transform.

Unit-III: Power Spectral Estimations   **(Hours: 09)**
Estimation of spectra from finite duration observation of signals.
Non-Parametric Methods: Bartlett, Welch, Blackman & Tukey methods. Performance Characteristics of Non-parametric Power Spectrum Estimators, Computational Requirements of Non-parametric Power Spectrum Estimates.

Parametric Methods of Power Spectral Estimation:
Auto correlation & Its Properties, Relationship between auto correlation & model parameters, Yule-Walker & Burg Methods, MA & ARMA models for power spectrum estimation.

Unit-IV: Linear Prediction **(Hours: 08)**
Forward and Backward Linear Prediction – Forward Linear Prediction, Backward Linear Prediction, Optimum reflection coefficients for the Lattice Forward and Backward Predictors. Solution of the Normal Equations: Levinson Durbin Algorithm, Schur Algorithm. Properties of Linear Prediction Filters.

Unit-V: Applications of Digital Signal Processing **(Hours: 10)**
Digital cellular mobile telephony, Adaptive telephone echo cancellation, High quality A/D conversion for digital Audio, Efficient D/A conversion in compact hi-fi systems, Acquisition of high quality data, Multirate narrow band digital filtering, High resolution narrow band spectral analysis.

Total Hours: 45

TEXT BOOKS:

1. John G. Proakis, Dimitris G. Manolakis, "*Digital signal processing, principles, Algorithms and applications",* Prentice Hall, 4th edition, 2007.
2. Sanjit K Mitra, "*Digital signal processing, A computer base approach",* McGraw-Hill Higher Education, 4th edition, 2011.

REFERENCE BOOKS:

1. Emmanuel C Ifeacher Barrie. W. Jervis, "*DSP-A Practical Approach*", Pearson Education, 2nd edition, 2002.

M. Tech. - I Semester
(19MT16102) DIGITAL SATELLITE COMMUNICATIONS
(Program Elective-1)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES: A Course on Satellite Communications at UG level

COURSE DESCRIPTION:

Orbital mechanics and satellite sub-systems; Non-geostationary satellite systems; Demand assignment multiple access techniques and packet communications; VSAT & MSAT Networks, DBS satellite TV and GPS.

COURSE OBJECTIVES:

To impart knowledge in various satellite orbits, satellite sub-systems, LEO and NGSO satellites, VSAT and MSAT networks, Direct Broadcast Satellite Television systems and Global Positioning System.
CEO1: To develop skills in design, analysis, problem solving and research in orbital mechanics, satellite link design, NGSO satellites, digital satellite networks such as Demand Assignment Multiple Access (DAMA) and Aloha networks.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1: Analyze various satellite orbits and satellite sub-systems to solve problems in orbital motion of satellites and satellite subsystems.
CO2: Analyze various LEO, GEO & NGSO constellation satellites and their design aspects for various satellite applications
CO3: Apply efficient techniques such as Erlang's formula, DA-TDMA techniques to evaluate the performance of digital satellite networks such as Demand Assignment Multiple Access (DAMA) and Aloha networks.
CO4: Analyze VSAT and MSAT networks and its configurations.
CO5: Analyze Direct Broadcast Satellite Television systems and GPS Position Location Principles, Recent communication satellites launched by NASA/ISRO.

DETAILED SYLLABUS:

Unit-I: Satellite Orbits and Subsystems   (Hours: 10)
Overview of Satellite Communications- Brief history, Orbital Mechanics, Look Angles determination, Orbital perturbations, Apogee- Perigee heights. Geo-stationary orbits-launching orbits, launch vehicles. Satellite Sub-Systems- Altitude and Orbit Control system, TT&C subsystem, Power systems, Communication subsystems, Satellite Antenna Equipment.

Unit-II: Low Earth Orbit and Non-Geostationary Satellite Systems   (Hours: 09)
Introduction-Orbit Considerations, Equatorial Orbits, Inclined Orbits, Elliptical Orbits, Molniya Orbit. Coverage and Frequency Considerations- General Aspects, Frequency band, Elevation Angle Considerations, Number of Beams Per Coverage, Off-Axis Scanning, Determination of Optimum Orbital Altitude, Projected NGSO System Customer Service Base. Delay and Throughput Considerations, System considerations- Incremental Growth, Interim Operations, Replenishment Options. Operational NGSO Constellation Designs- Ellipse, Global star, New ICO, Iridium, Orbcomn, Sky bridge, Teledesic.

Unit-III: Efficient Techniques and Satellite Packet Communications
(Hours: 10)

Demand Assignment Multiple Access and Digital Speech Interpolation: The ERLANG B Formula, Types of Demand Assignments, DAMA Characteristics, Real-Time Frame Reconfiguration- Frame and Burst Structures for DA-TDMA. DAMA Interfaces, SCPC-DAMA, SPADE, Digital Speech Interpolation.

Satellite Packet Communications: Preliminaries, Message Transmission by FDMA-The M/G/1 Queue, Message Transmission by TDMA, Pure ALOHA-Satellite Packet Switching, Slotted ALOHA, Packet Reservation, Tree Algorithm.

Unit-IV: VSAT and MSAT Networks
(Hours: 08)

Very Small Aperture Terminal Networks: VSAT Technologies, Network Configurations, Multi-access and Networking, Network Error Control.

Mobile Satellite Networks: Operating Environment, MSAT Network Concept, CDMA MSAT Network, Statistics of Mobile Propagation.

Unit-V: Direct Broadcast Satellite Television and Global Positioning System
(Hours: 08)

Direct Broadcast Satellite Television and Radio

C-Band and Ku-Band Home Satellite TV, Digital DBS TV, DBS-TV System Design, Error Control in Digital DBS-TV, Master Control Station and Uplink, Installation of DBS-TV Antennas, Satellite Radio Broadcasting.

Global Positioning System

Introduction, GPS Position Location Principles, Recent communication satellites launched by NASA/ISRO.

Total Hours: 45

M. Tech. -I Semester
(19MT16103) WIRELESS SENSOR NETWORKS
(Program Elective-1)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES:

A Course on Computer Networks and Wireless Communication and Networks at UG Level.

COURSE DESCRIPTION:

WSN architecture, types, Quality measures of wireless channels, various MAC protocols, Sensor deployment and routing related protocols, congestion control and cross layer architectures in WSNs.

COURSE OBJECTIVES:

CEO1: To impart knowledge in various layers of OSI model and cross layer design with respect to Wireless Sensor Networks.
CEO2: To develop skills in design, analysis and problem solving related to the field of WSNs.
CEO3: Apply knowledge and skills for performance analysis of WSNs.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1: Analyze the problems in wireless sensor networks, ad-hoc networks and nodes mobility.
CO2: Analyze wave propagation effects and noise, channel models, modulation and demodulation issues for conducting research related to physical layer of wireless sensor network.
CO3: Develop the MAC and link layer protocols to provide the solutions for energy usage and compare the performance with existing approach.
CO4: Build the minimum path routing protocols and data aggregation schemes pertaining to network layer in order to solve the energy utilization problems.
CO5: Apply sensing models and cross layer approaches to solve the coverage issue and measure the performance of WSNs.

DETAILED SYLLABUS:

Unit-I: Introduction to Wireless Sensor Networks   (Hours: 09)
Challenges for wireless sensor networks, Comparison of sensor network with ad hoc network, Single node architecture - Hardware components, energy consumption of sensor nodes. Operating systems and execution environments - Case Study: TinyOS and nesC. Examples of sensor nodes - Mica Mote, EYES Nodes, BTnodes. Network architecture: Sensor network scenarios - types of sources and sinks, single hop versus multi-hop networks, multiple sinks and sources, Three types of mobility.

Unit-II: Physical Layer   (Hours: 09)
Introduction, wireless channel and communication fundamentals – frequency allocation, modulation and demodulation, wave propagation effects and noise, channels models, packet transmission and synchronization, quality of wireless channels and measures for improvement. Physical layer and transceiver design consideration in wireless sensor networks - Energy usage profile, choice of modulation, Antenna considerations.

Unit-III: Data Link Layer (Hours: 09)

MAC protocols: fundamentals of wireless MAC protocols - Requirements and design constraints for wireless MAC protocols, Important classes of MAC protocols, MAC protocols for wireless sensor networks. Low duty cycle protocols and wakeup concepts - STEM, S-MAC. Contention-based protocols - CSMA protocols, PAMAS. Schedule-based protocols - LEACH, BMAC, Traffic-adaptive medium access protocol (TRAMA).

Link Layer protocols – fundamentals task and requirements, error control - Causes and characteristics of transmission errors, ARQ techniques, FEC techniques – Conceptual View, Hybrid schemes, Power control

Unit-IV: Network Layer (Hours: 09)

Gossiping and agent-based uni-cast forwarding - Basic idea, Randomized forwarding. Energy-efficient unicast, Broadcast and multicast - Source-based tree protocols, Shared, core-based tree protocols. Mobile nodes - Mobile sinks, Mobile data collectors, Mobile regions. Data centric and content-based networking - Introduction, Data-centric routing, Data aggregation.

Unit-V: Transport Layer and Cross layer design (Hours: 09)

The transport layer and QoS in wireless sensor networks - Quality of service/reliability, Transport protocols. Coverage and deployment - Sensing models, Uniform random deployments: Poisson point processes, Reliable data transport. Congestion control and rate control - Congestion situations in sensor networks. The CODA congestion-control framework. **Cross-Layer Design**: Definition, Cross-Layer Design for Traditional Networks, Cross-layer architectures for Sensor Networks: Sensor Protocol, TinyCubus, Lu.

Total Hours: 45

M. Tech. – I Semester
(19MT13806) ADAPTIVE SIGNAL PROCESSING
(Common to CMS & DECS)
(Program Elective - 2)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES:

A Course on Signal Processing at UG Level

COURSE DESCRIPTION:

Development of adaptive filter theory; Method of steepest descent;Least-Mean-Square Algorithm and recursive least square algorithm; Kalman filtering algorithm; order - recursive adaptive filters.

COURSE OBJECTIVES:

CEO1: To impart advanced knowledge in various adaptive algorithms for designing optimal filters.
CEO2: To analyze, design and implement adaptive filters using LMS, RLS and Kalman filtering algorithms for solving problems in the fields of signal processing, communications, Bio- Medical, Instrumentation and control engineering.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1: Understand linear optimum and adaptive filters to determine mean square error.
CO2: Analyze Steepest-Descent Algorithm and apply to the wiener filters.
CO3: Solve problems in the error minimization using LMS and RLS Algorithms.
CO4: Develop kalman and non Linear adaptive filters in the fields of signal processing, communications, Bio-Medical, Instrumentation and control engineering for optimization.
CO5: Analyze adaptive forward and backward linear prediction.

DETAILED SYLLABUS:

Unit-I: Introduction to Adaptive Systems & Development of Adaptive Filter Theory **(Hours: 10)**
Eigen Value Problem, Properties of eigen values and eigen vectors(proof is not required), Eigen Filters, eigen Value computations. The Filtering problem,Linear Optimum Filters, Adaptive Filters, Linear Filter sturucters, Approaches to the development of linear adaptive filters. Linear Optimum Filtering: Statement of the problem, Principle of Orthogonality, Minimum Mean Square Error, Wiener- Hopf equations, Error- Performance Surface.

Unit-II: Method of Steepest Descent **(Hours: 07)**
Basic Idea of Steepest-Descent Algorithm, Steepest-Descent Algorithm applied to the Wiener Filter, Stability of the Steepest-Descent Algorithm, Examination of the transient behavior of the Steepest-Descent Algorithm, the Steepest-Descent Algorithm as a deterministic search method, Virtue and limitation of the Steepest-Descent Algorithm.

Unit-III: Least-Mean-Square Adaptive Filters and Recursive Least-Squares Adaptive Filters   **(Hours: 10)**

Overview of the structure and operation of the Least-Mean-Square Algorithm, Least-Mean-Square adaptation Algorithm, Applications-Adaptive Noise cancelling Applied to a Sinusoidal Interference and Adaptive Beam forming, Comparison of the LMS Algorithm with Steepest-Descent Algorithm.

Matrix Inversion lemma, exponentially weighted recursive least square algorithm, update recursion for the sum of weighted error squares, Single-Weight Adaptive Noise Canceller convergence analysis of RLS Algorithm.

Unit-IV: Kalman Filtering & Non Linear Adaptive Filtering   **(Hours: 10)**

Recursive Minimum Mean-Square Estimation for Scalar Random variables, Statement of Kalman filtering problem, The Innovations Process, estimation of the state using the Innovations Process, Filtering, Initial conditions.

An overview of the Blind Deconvolution problem, Buss Gang Algorithm for blind Equalization.

Unit-V: Order-Recursive Adaptive Filters   **(Hours: 08)**

Gradient-Adaptive Lattice Filter, order-recursive adaptive filters using least square estimation, adaptive forward linear prediction, adaptive backward linear prediction, conversion factor, least-square lattice predictor, angle-normalized estimation errors, first order state space models for lattice filtering.

                                         Total Hours: 45

TEXT BOOK:

1. Simon Haykin, *"Adaptive Filter Theory",* Pearson Education, 4th edition, 2002.

REFERENCE BOOK:

1. Bernard Widrow, Samuel D. Strearns, *"Adaptive Signal Processing",* Pearson Education, 1985.

M. Tech. - I Semester
(19MT16104) OPTICAL NETWORKS
(Program Elective-2)

Int. Marks	Ext. Marks	Total Marks		L	T	P	C
40	60	100		3	-	-	3

PRE-REQUISITES: A Course on Satellite Communications at UG level

COURSE OBJECTIVES:

CEO1: To impart knowledge in Characteristics of Optical fiber, Fiber design considerations. Losses in Cable design advanced fiber optic components Modulation and demodulation techniques, Access networks and Network Control and Management.

CEO2: To develop skills in design, analysis and problem solving related to Optical Fibers, Optical Cables and Optical Networks.

CEO3: Apply knowledge and skills for performance analysis of Optical fibers, cables, Optical Modulation and Demodulation and Optical Networks.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1: Design various types of optical fibers to reduce the effect of impairments like noises, fiber losses, dispersion and Scattering.

CO2: Analyze the fiber design objectives, various cable structures, Connector alignment techniques and other fiber optic components for communication and networking.

CO3: Analyze the performance of various Optical modulation and Demodulation Techniques.

CO4: Apply appropriate techniques to evaluate the performance of Optical networks such as Enhanced HFC, Fiber to the curb (FTTC), PON, GPON and AON.

DETAILED SYLLABUS:

Unit-I: Introduction (Hours: 08)
Evolution of fiber types, guiding properties of fibers, cross talk between fibers, coupled modes and mode mixing, dispersion properties of fibers, nonlinear effects of optical fibers- SRS, SBS, intensity dependent refractive index. Characterizations of materials for fibers, fiber preform preparation- Soot deposition, MCVD. Fiber drawing and control, roles of coating and jacketing.

Unit-II: Optical Cable Design (Hours: 08)
Fiber design considerations-Fiber diameter, Cladding thickness, Low and high bit rate systems. Design objectives and cable structures, Fiber splicing- fiber end preparation, single and array splices, measurement of splicing effects. Optical fiber connectors-The role of connectors, Connector alignment techniques.

Unit-III: Fiber optic components for communication and networking
(Hours: 10)
Couplers, Isolators and Circulators, Multiplexers & filters- Bragg Gratings, Fabry-Perot Filters, Mach-Zehnder Interferometers, Arrayed Waveguide Grating, Acousto-Optic Tunable Filter, High Channel Count Multiplexer Architectures. Optical Amplifiers- Erbium Doped Fiber amplifiers, Raman amplifiers, Transmitters- LED, Lasers, Direct and External Modulation, Detectors- Photo detectors. Optical Switches – Large Optical Switches. Wavelength Converters – Optoelectronic Approach, Optical gating.

Unit-IV: Modulation and Demodulation   **(Hours: 08)**

Signal formats for Modulation, Subcarrier Modulation and Multiplexing, Optical Modulations – Duo binary, Single Side Band and Multilevel Schemes, Demodulation- Ideal and Practical receivers, Bit Error Rates, Coherent Detection, Timing Recovery and Equalization, Reed-Solomon Codes for Error Detection and Correction.

Unit-V: Optical Networks and Management   **(Hours: 11)**

Access Networks - architecture overview, Introduction to Enhanced HFC, Fiber to the curb (FTTC), PON, GPON and AON. Photonic packet switching - OTDM, Synchronization. Deployment considerations - Designing the transmission layer using SDM, TDM, WDM, Unidirectional versus Bidirectional WDM Systems.
Control and Management- Network Management functions, Performance and fault management, Configuration Management, Optical Safety.

Total Hours: 45

TEXT BOOKS:

1. S. E. Miller, A. G. Chynoweth, "*Optical Fiber Telecommunication*", 1979.
2. Rajiv Ramaswamy, Kumar N. Sivaranjan and Galen H. Sasaki, *"Optical Networks"*, Elsevier, 3rd edition, 2010.

M. Tech. - I Semester
(19MT16105) SMART ANTENNAS
(Program Elective-2)

Int. Marks	Ext. Marks	Total Marks		L	T	P	C
40	60	100		3	-	-	3

PRE-REQUISITES:

A Course on Antennas and Wave Propagation at UG Level

COURSE OBJECTIVES:

CEO1: To provide advanced knowledge in design of smart antennas, estimation of Direction of arrival and beam forming techniques.

CEO2: To impart analysis, problem solving, and application skills in smart antennas.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1: Understand Smart antenna architecture and configurations, Beam forming fundamentals, Space time processing, Methods of DOA, Mutual coupling, and capacity & data rates in MIMO systems.

CO2: Analyze design issues for DOA estimation, beam forming and adaptive signal processing algorithms of smart antennas.

CO3: Realize, compare and estimate optimum beam formers like SNR, SINR, MMSE, diversity for Rayleigh-Fading channel and Trellis Coded Modulation to smart antennas in the field of communication.

CO4: Analyze various DOA algorithms in Smart Antennas for wireless applications.

CO5: Apply beam-forming techniques to design smart antennas in the field of wireless communication, Bio medical, Military, Radar, Air traffic, and Satellite.

DETAILED SYLLABUS:

Unit-I: Smart Antennas   (Hours: 10)
Introduction, Need for Smart Antennas, Overview, Smart Antenna Configurations-Switched Beam Antennas, Adaptive Antenna Approach. Space Division Multiple Access (SDMA), Architecture of a Smart Antenna System- Receiver, Transmitter. Benefits and Drawbacks, Basic Principles, Mutual Coupling Effects.

Unit-II: DOA Estimation Fundamentals   (Hours: 10)
Introduction, Array Response Vector, Received Signal Model, Subspace-Based Data Model, Signal Autocovariance matrices, Conventional DOA Estimation Methods-Conventional Beamforming Method, Capon's Minimum Variance Method. Subspace Approach to DOA Estimation- MUSIC Algorithm, ESPRIT Algorithm. Uniqueness of DOA Estimates.

Unit-III: Beam Forming Fundamentals   (Hours: 08)
Classical Beam former, Statistically Optimum Beamforming Weight Vectors- Maximum SNR Beam former, Multiple Sidelobe Canceller and Maximum SINR Beam former, Minimum Mean Square Error (MMSE). Adaptive Algorithms for Beamforming

Unit-IV: Integration and Simulation of Smart Antennas **(Hours: 11)**
Overview, Antenna Design, Mutual Coupling, Adaptive Signal Processing Algorithms-DOA, Adaptive Beam forming, Beam forming and Diversity Combining for Rayleigh-Fading Channel. Trellis-Coded Modulation (TCM) for Adaptive Arrays, Smart Antenna Systems for Mobile Ad Hoc Networks (MANETs)- Protocol, Simulations, Discussion.

Unit-V: Space–Time Processing **(Hours: 08)**
Introduction, Discrete Space–Time Channel and Signal Models, Space–Time Beamforming, Intersymbol and Co-Channel Suppression, Space–Time Processing for DS-CDMA, Capacity and Data Rates in MIMO Systems, Discussion.

Total Hours: 47

TEXT BOOKS:

1. Constantine A. Balanis & Panayiotis I. Ioannides, "*Introduction to Smart Antennas*", Morgan & Claypool Publishers, Series, 1st edition, 2007.
2. Joseph C. Liberti Jr., Theodore S Rappaport , "*Smart Antennas for Wireless Communications IS-95 and Third Generation CDMA Applications*", 1st edition, PTR – PH, 1999.

(19MT10708) RESEARCH METHODOLOGY AND IPR

(Common to all M. Tech. Programs)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	2	-	-	2

PRE REQUISITES:

COURSE DESCRIPTION:

Overview of research; research problem and design; various research designs; Data collection methods; Statistical methods for research;Interpretation& drafting reports and Intellectual property rights.

COURSE OBJECTIVES:

CEO1: To impart knowledge on research methodology and subsequent process involved for successful accomplishment of the research.

CEO2: To impart knowledge on intellectual property rightsand subsequent process involved infiling patents and trade mark registration process.

CEO3: To inculcate attitude of reflective learning and contribute to the society through fruitful research.

COURSE OUTCOMES:

On successful completion of the course, student will be able to:

CO1: Apply the conceptual knowledge of research methodology to formulate the hypothesis, data collection and processing, analyzing the data using statistical methods, interpret the observations and communicating the novel findings through a research report.

CO2: Practice ethics and have responsibility towards society throughout the research process and indulge in continuous learning process.

CO3: Apply the conceptual knowledge of intellectual property rights for filing patents and trade mark registration process.

DETAILED SYLLABUS:

Unit-I: Introduction to Research Methodology (Hours: 07)
Objectives and Motivation of Research, Types of Research, Defining and Formulating the Research Problem; Features of research design, Different Research Designs; Different Methods of Data Collection, Data preparation and Processing.

Unit-II: Data Analysis and Hypothesis Testing (Hours: 09)
ANOVA; Principles of least squares-Regression and correlation; Normal Distribution-Properties of Normal Distribution; Testing of Hypothesis – Hypothesis Testing Procedure, Types of errors, t-Distribution, Chi-Square Test as a Test of Goodness of Fit.

Unit-III: Interpretation and Report Writing (Hours: 04)
Interpretation – Need, Techniques and Precautions; Report Writing – Significance, Different Steps, Layout, Types of reports,Mechanics of Writing a Research Report, Precautions in Writing Reports; Research ethics.

Unit-IV: Introduction to Intellectual Property and Trade Marks   (Hours: 07)
Importance of intellectual property rights; types of intellectual property, international organizations; Purpose and function of trademarks, acquisition of trade mark rights, protectable matter, selecting and evaluating trade mark, trade mark registration processes.

Unit-V: Law of Copyrights   (Hours: 08)
Fundamental of copy right law, originality of material, rights of reproduction, rights to perform the work publicly, copy right ownership issues, copy right registration, notice of copy right, international copy right law.
Law of patents: Foundation of patent law, patent searching process, ownership rights and transfer
New Developments in IPR: Administration of Patent System.

Total Hours: 35

TEXT BOOKS:

1. C.R. Kothari, "*Research Methodology: Methods and Techniques*", 2nd revised edition, New Age International Publishers, New Delhi, 2004.
2. Deborah, E. Bouchoux, "*Intellectual property right*", 5th edition, Cengage learning, 2017.

REFERENCE BOOKS:

M. Tech. – I Semester
(19MT13832) COMMUNICATIONS AND SIGNAL PROCESSING LAB
(Common to CMS & DECS)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
50	50	100	-	-	4	2

PRE-REQUISITES:

Simulation Lab at UG Level

COURSE DESCRIPTION:

Design and simulation of communication systems - QPSK communication system over AWGN channel and Rayleigh fading channel; Generation of maximal and Gold code sequences; Simulation of Rayleigh Fading Channel Using Either Clarke's Model or Jake's Model for different Doppler Spreads; Performance Evaluation of RAKE Receiver over Slow Fading Channel.

COURSE OBJECTIVES:

CEO1: To design, develop and simulate various components of digital communications and adaptive algorithms.
CEO2: To apply Knowledge and Skills to implement engineering Principles in the fields of Communications and Signal processing.

COURSE OUTCOMES:

On successful completion of this course the students will be able to

CO1: Analyze, measure, interpret and validate the practical observations by applying the conceptual knowledge of communication, signal and Image processing.
CO2: Design IIR and FIR filters for desired specifications.
CO3: Work individually and in groups to solve problems with effective communication.

LIST OF EXERCISES /EXPERIMENTS:

1. Design and Simulation FIR Filter Using any Windowing Technique.
2. Design of IIR Filters from Analog Filters.
3. Generation of Maximal Sequences and Gold Sequences.
4. Performance Evaluation of QPSK System over AWGN Channel.
5. Equalization of Multipath Channel using LMS or RLS Algorithms.
6. Simulation of Rayleigh Fading Channel Using Either Clarke's Model or Jake's Model for different Doppler Spreads (Ex. 50 Hz and 100 Hz).
7. Performance Evaluation of RAKE Receiver over Slow Fading Channel.
8. Performance Evaluation of QPSK System over Rayleigh Fading Channel.
9. Smoothening & Sharpening of a given image.
10.Color image in various color models.

REFERENCE BOOKS/LABORATORY MANUALS:

1. Communications and Signal Processing Lab Manual of the Department.
2. W.H. Tranter, K. Sam Shanmugham, T.S. Rappaport, and K.L. Kosbar, "*Principles of Communication System Simulation with Wireless Applications,*" Pearson, 2004.

M. Tech. – I Semester
(19MT16131) RF CIRCUIT DESIGN AND MICROWAVE DEVICES LAB

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
50	50	100	-	-	4	2

PRE-REQUISITES:

Name of the Pre-requisite Course(s) Antennas, Microwaves and Optical Communication lab at UG level

COURSE OBJECTIVES:

CEO1: To design, develop and simulate various circuits at Radio frequency and Optical Communication Systems.
CEO2: To apply Knowledge and Skills to implement engineering Principles in the field of RF, Microwave and Optical Communications.

COURSE OUTCOMES:

On successful completion of this course, the students will be able to:

CO1: Analyze , measure, interpret and validate the practical observations by applying the conceptual knowledge of Antennas and transmission lines.
CO2: Design different antennas for RF, Microwave and Optical communications and measure the parameters using antenna set up.
CO3: Work individually and in teams collaboratively in implementing mini projects.

LIST OF EXERCISES /EXPERIMENTS:

1. Measurement of Frequency, Wavelength and Impedance.

2. Characteristics of branch line directional coupler.

3. Measurement of coupling & cross talk in 3 wire pick up.

4. Characterization of current probe with capacitive coupling or inductive coupling.

5. Study of non-ideal behaviour of lumped circuit components.

6. Measure characteristics of passive components such as attenuator, isolator, and coupler.

7. Measurement of the effect of CO-POLARIZATION and CROSS-POLARIZATIION sing vertical and horizontal polarization of antenna.

8. VSWR Measurement and Impedance Calculation. Measure the VSWR using normal method and double minima method. Measure the frequency using the frequency meter and compare with calculated guided wavelength. Calculate the input impedance of a given load from the VSWR measurements and shift in the minima.

9. To study the behavior of terminated coaxial transmission line in both frequency and time domains.

10. Design of an Antenna using FIKO suit, determine the radiation pattern with Antenna setup.

REFERENCE BOOKS/LABORATORY MANUALS:

1. RF Circuit & Optical Communications lab-II manual of the department.
2. RF Spice Pro User Manual.
3. Devendra K. Misra, " *Radio Frequency and Microwave Communication Circuits – Analysis and Design*", Wiley Student Edition, John Wiley & Sons, 2nd edition, July 2004.

SOFTWARES/TOOLS USED:
RF Spice Pro simulation software

ADDITIONAL LEARNING RESOURCES
MIC System, Motorized microstrip transmission line trainer, passive component, cable dispersion.

M. Tech. - I Semester
(19MT1AC01) TECHNICAL REPORT WRITING
(Audit Course)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
-	-	-	*2*	-	-	-

PRE-REQUISITES: -

COURSE DESCRIPTION:

Introduction; Process of writing; Style of writing; Referencing; Presentation.

COURSE OBJECTIVES:

CEO1: To impart the knowledge of structure and layout of Business and Technical Reports.
CEO2: To learn styles and \techniques of description for effective reports.
CEO3: To develop the ability to understand & interpret the writing techniques for effective communication in written documents.

COURSE OUTCOMES:

After successful completion of this course, the students will be able to:

CO1: Demonstrate knowledge of Technical Report Writing by examining kinds of reports and structure with scientific attitude.
CO2: Apply the techniques in preparing effective reports by examining Techniques of Description, Describing Machines and Mechanisms and Describing Processes.
CO3: Communicate effectively through writing technical reports by demonstrating the knowledge of Industry Reports, Survey Reports, Interpretive Report and Letter Report.

DETAILED SYLLABUS:

Unit-I: Introduction   **(Hours: 06)**
Introduction to Technical Report - Types of Reports - Planning Technical Report Writing - Components of a Technical Report - Report Writing in Science and Technology - Selecting and Preparing a 'Title' - Language Use in Report Writing.

Unit-II: Process of Writing   **(Hours: 05)**
Writing the 'Introduction' - Writing the 'Materials and Methods' - Writing the Findings/Results' - Writing the 'Discussion' - Preparing and using 'Tables'.

Unit-III: Style of Writing   **(Hours: 06)**
Preparing and using Effective 'Graphs' - Citing and Arranging References—I - Citing and Arranging References —II - Writing for Publication in a Scientific Journal.

Unit-IV: Referencing   **(Hours: 09)**
Literature citations - Introductory remarks on literature citations - Reasons for literature citations – Bibliographical data according to ISO - Citations in the text - Copyright and copyright laws - The text of the Technical Report - Using word processing and desktop publishing (DTP) systems - Document or page layout and hints on editing - Typographic details - Cross-references.

Unit-IV: Presentation   **(Hours: 04)**

Giving the presentation - Appropriate pointing - Dealing with intermediate questions - Review and analysis of the presentation - Rhetoric tips from A to Z.

Total Hours: 30

TEXT BOOKS:

1. R C Sharma – Krishna Mohan, *"Business Correspondence and Report Writing",* Tata McGraw-Hill Publishing Company Limited, New Delhi, Third Edition, 2005 (reprint).
2. Patrick Forsyth*, "How to Write Reports and Proposals,* THE SUNDAY TIMES (Kogan Page)", New Delhi, Revised Second Edition, 2010.

REFERENCE BOOKS:

1. John Seely, *"The Oxford Writing & Speaking"*, Oxford University Press, Indian Edition.
2. Anne Eisenberg, *"A Beginner's Guide to Technical Communication"*, McGraw Hill Education (India) Private Limited, New Delhi, 2013.

ADDITIONAL LEARNING RESOURCES

M. Tech. - II Semester
(19MT23801) ADVANCED WIRELESS COMMUNICATIONS
(Common to CMS & DECS)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PREREQUISITES:

A Course on Digital Communications at UG Level.

COURSE DESCRIPTION:

Introduction to cellular wireless communication systems; Radio propagation in mobile environment; Equalization and Diversity techniques; Multiple access techniques; Introduction to wireless networking; Multicarrier modulation techniques.

COURSE OBJECTIVES:

CEO1 : To get introduction of cellular wireless communication and to analyze Radio propagation in mobile atmosphere

CEO2 : To design Equalization along with Diversity techniques and To Solve the problems several access techniques, wireless networking and Multicarrier modulation techniques.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1 : Understand wireless cellular networks and standards, Frequency reuse concept, and solve for Capacity of Cellular Systems.

CO2 : Analyze Large Scale Path Loss, Small Scale Fading in wireless environment, solve engineering problems on power at the receiver in free space propagation.

CO3 : Design and solve engineering problems for analyzing Equalization and Diversity Techniques.

CO4 : Solve engineering problems and calculate with wide range of solutions in Multiple access protocols, Packet Radio and Reservation protocols and Traffic Routing in Wireless Networks,

CO5 : Apply appropriate techniques to engineering activities in MIMO and multicarrier modulation.

DETAILED SYLLABUS:

Unit-I: Introduction to Wireless Communication Systems and Cellular Concept
(Hours: 09)
Evolution of Mobile Radio Communication Systems, Examples of Wireless Communication Systems, 1G, 2G, 2.5G,3G and 4G Wireless Cellular Networks and Standards, Frequency Reuse Concept, Channel Assignment Strategies, Interference and System Capacity, Trunking and Grade of Service, Improving Coverage and Capacity in Cellular Systems- cell splitting and sectoring. Problem solving.

Unit-II: Mobile Radio Propagation **(Hours: 09)**
Large Scale Path Loss: Introduction, Free Space Propagation Model, Relating Power to Electric field, Propagation Mechanisms – Reflection, Diffraction, and Scattering. Practical Budget Design using Path Loss Models, Outdoor and Indoor Propagation Models. Problem solving.

Small Scale Fading and Multipath: Small Scale Multipath Propagation, Impulse Response Model of a Multipath Channel, Small Scale Multipath Measurements, Parameters of Mobile Channels, Types of Small Scale Fading (all variations*) Statistical Models– Clarke's Model for Flat Fading, and Jake's Model. Problem solving.

Unit-III: Equalization & Diversity Techniques (Hours: 09)
Equalization: Introduction, Survey of Equalization Techniques, Linear and Non-linear Equalizers – Linear Transversal Equalizer, Decision Feedback Equalizer (DFE). Algorithms for Adaptive Equalization – Zero Forcing, LMS, and RLS. Problem solving.
Diversity Techniques: Realization of Independent Fading Paths, Receiver Diversity – System Model, Selection Combining, Threshold Combining, Maximal Ratio Combining, and Equal Gain Combining, Rake receiver. Transmit Diversity–Channel known at Transmitter, Channel unknown at Transmitter – the Alamouti Scheme, analysis.

Unit-IV: Multiple Access Techniques & Networking (Hours: 09)
Introduction to Multiple Access: FDMA, TDMA, CDMA, SDMA, Packet Radio- Pure ALOHA, Slotted ALOHA, CSMA, and Reservation protocols. Capacity of Cellular Systems- Cellular CDMA. Capacity of CDMA with Multiple Cells Problem Solving.
Introduction to Wireless Networking: Introduction to Wireless Networks, Differences between Wireless and Fixed Telephone Networks, Development of Wireless Networks, Traffic Routing in Wireless Networks, Wireless Data Services, Common Channel Signaling.

Unit-V: Multicarrier Modulation (Hours: 09)
Data Transmission using Multiple Carriers, Multicarrier Modulation with Overlapping Sub channels, Discrete Implementation of Multicarrier Modulation –
DFT and its properties, The Cyclic Prefix, Orthogonal Frequency Division Multiplexing (OFDM), Matrix Representation of OFDM, Vector Coding. Challenges in Multicarrier Systems. Problem solving.
MIMO and Multicarrier Modulation: Narrowband MIMO model-parallel decomposition of MIMO channel-MIMO channel capacity-MIMO diversity gain –data transmission using multiple carriers multicarrier modulation with overlapping sub channels-mitigation of subcarrier fading.

Total Hours: 45

M. Tech. – I/II Semester
(19MT13804) IMAGE AND VIDEO PROCESSING
(Common to CMS & DECS)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES:

A Course on Digital Communications & Digital Signal Processing at UG Level

COURSE OBJECTIVES:

CEO1: To impart knowledge in fundamentals that helps in developing various algorithms pertaining to Image and Video Processing.
CEO2: To attain skills required for analysis, design and problem solving by the use of techniques required for modeling of image and video processing.
CEO3: To inculcate attitude for providing solutions for societal use in the area of image and video processing.

COURSE OUTCOMES:

After completion of this course, student will be able to:

CO1: Apply sampling, quantization, transformation and filtering techniques on image & video.
CO2: Analyze Image enhancement, restoration, segmentation techniques for improving visual quality of image
CO3: Analyze compression techniques to reduce the storage capacity of image
CO4: Develop three dimensional motion models, motion estimation methods and filtering techniques in video processing.

DETAILED SYLLABUS:

Unit-I: Fundamentals of Image Processing and Image Transforms   (Hours: 07)
Fundamental steps in Image Processing, Gray scale and color Images, image sampling and quantization, **2-D Transforms:** DFT, Walsh, Hadamard, Haar, KLT, DCT.

Unit-II: Image Enhancement & Restoration   (Hours: 09)
Enhancement: Intensity transformation functions, Filters in spatial and frequency domains, histogram processing, homomorphic filtering.
Restoration: Image Degradation Model, Restoration in presence of noise only- spatial filtering, inverse filtering, Wiener filtering and Constrained least squares filtering.

Unit-III: Image Compression & Image Segmentation   (Hours: 09)
Image compression fundamentals -Redundancies, Compression models: Lossy & Lossless Predictive coding, Arithmetic coding, Bit plane coding, Run length coding, symbol based coding, Transform coding, Digital Watermarking.
Segmentation: Fundamentals, Point, line and edge detection, Thresholding, Region based segmentation.

Unit-IV: Video Processing- I   (Hours: 10)
Analog Video, Digital Video. Time-Varying Image Formation models: Three-Dimensional Motion Models, Geometric Image Formation, Photometric Image Formation, Sampling for Analog and Digital Video, Two-Dimensional Rectangular Sampling, Two-Dimensional Periodic Sampling, Sampling on 3-D Structures, Reconstruction from Samples.

Unit-V: Video Processing –II   **(Hours: 10)**

Motion Estimation: 2-D Motion vs. Apparent Motion, 2-D Motion Estimation, Methods Using the Optical Flow Equation. Video filtering: motion compensated filtering, noise filtering, restoration, video compression standards.

Total Hours: 45

TEXT BOOKS:

1. "*Digital Image Processing*", Gonzalez and Woods, 3rd ed., Pearson Education, 2008.
2. A. M. Tekalp, "*Digital Video Processing*", Prentice-Hall, 1995.

M. Tech. – II Semester
(19MT23802) MIMO SYSTEM
(Common to CMS & DECS)
(Program Elective - 3)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES:

Concept of Basic Electronics and Wave Theory at UG level

COURSE OBJECTIVES:

CEO1: To impart advanced knowledge in the fields of MIMO.
CEO2: To develop analytical, problem solving, design and application skills in the broad area of MIMO System.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1: Understand multi-antenna systems , channel modeling and effect of LOS and XPD on MIMO Capacity.
CO2: Analyze diversity and spatial multiplexing in MIMO systems.
CO3: Apply MIMO coding techniques in the field of wireless communication systems.

DETAILED SYLLABUS:

Unit-I: Introduction to MIMO System   (Hours: 06)
Introduction to Multi-antenna Systems, Motivation, Types of multi-antenna systems, MIMO vs. multi-antenna systems.

Unit-II: The MIMO Wireless Channel   (Hours: 10)
Introduction, preliminaries, MIMO System Model, MIMO System Capacity, Channel Unknown to the Transmitter, Channel known to the Transmitter, Deterministic Channel, Random Channels, Influence of Fading Correlation on MIMO Capacity, Influence of LOS on MIMO Capacity, Influence of XPD on MIMO Capacity, Keyhole Effect: Degenerate Channels, Capacity of Frequency Selective MIMO Channels.

Unit-III: MIMO Diversity and Spatial Multiplexing   (Hours: 09)
Sources and types of diversity, analysis under Rayleigh fading, Diversity and channel knowledge. Alamouti space time code, MIMO spatial multiplexing. Space time receivers. ML, ZF, MMSE and Sphere decoding, BLAST receivers and Diversity multiplexing trade-off.

Unit-IV: Space Time Block Codes   (Hours: 10)
Space time block codes on real and complex orthogonal designs, Code design criteria for quasistatic channels (Rank, determinant and Euclidean distance), Orthogonal designs, Generalized orthogonal designs, Quasi-orthogonal designs and Performance analysis.

Unit-V: Space Time Trellis Codes   (Hours: 10)
Representation of STTC, shift register, generator matrix, state-transition diagram, trellis diagram, Code construction, Delay diversity as a special case of STTC and Performance analysis.

Total Hours: 45

TEXT BOOKS:

1. Claude Oestges, Bruno Clerckx, "*MIMO Wireless Communications: From Real-world Propagation to Space-time Code Design*", Academic Press, 1st edition, 2010.

M. Tech. - II Semester
(19MT23803) SPEECH PROCESSING
(Common to CMS & DECS)
(Program Elective - 3)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES:

Courses on Signals & Systems and Digital Signal Processing in UG

COURSE DESCRIPTION:

Acoustic theory of speech production; Models for speech signals and speech processing systems; Mathematical analysis of speech signals - homomorphic and LPC models; Speech and speaker recognition systems.

COURSE OBJECTIVES:

CEO1: To impart knowledge in understanding the concepts of Speech Processing in VLSI.
CEO2: To develop skills in analysis and problem solving using efficient algorithms for feasible and optimal solutions in Speech signal processing field.
CEO3: Apply knowledge and skills for rational analysis of speaker identification and verification systems.

COURSE OUTCOMES:

After the completion of the course, the student will be able to

CO1: Understand the process of speech production mechanism and analyze the mathematical model of acoustic speech production system to develop digital model for speech signals.
CO2: Analyze various time domain models such as short time and autocorrelation methods to solve problems in estimating pitch period of speech signals with appropriate techniques.
CO3: Analyze complex Cepstrum of speech, pitch detection and formant estimation in Homomorphic Speech Processing.
CO4: Apply Cholesky Decomposition & Durbin's Recursive approaches to solve LPC Equations in Pitch detection and Formant analysis applications.
CO5: Understand speaker verification system, speaker identification systems and Speech recognition systems.

DETAILED SYLLABUS:

Unit-I: Digital Model for the Speech Signal   **(Hours: 11)**
The process of speech production - the mechanism of speech production, acoustic phonetics. The Acoustic theory of speech production- sound propagation, uniform lossless tubes, Effect of losses in the vocal tract, Effect of radiation at the lips, Vocal tract transfer functions for vowels, the effect of nasal coupling, Excitation of sound in the vocal tract. Digital model for speech signals.

Unit-II: Time Domain Models for Speech Processing   **(Hours: 09)**
Introduction, Window considerations, Short time energy and average magnitude, Short time average zero crossing rate, Speech vs silence discrimination using Average energy and zero crossing, Pitch period estimation using parallel processing approach, The short time autocorrelation function, The short time average magnitude difference function, Pitch period estimation using the autocorrelation function.

Unit-III: Homomorphic Speech Processing   **(Hours: 08)**

Homomorphic systems for convolution – properties of the complex Cepstrum, computational considerations. The complex Cepstrum of speech, pitch detection, formant estimation, Homomorphic vocoder.

Unit-IV: Linear Predictive Coding of Speech   **(Hours: 10)**

Basic principles of linear predictive analysis – Auto correlation method, The covariance method. Computation of the gain for the model, solution of LPC Equations – Cholesky Decomposition solution for the covariance method. Durbin's Recursive solution for the autocorrelation equations. Comparison between methods of solutions of LPC analysis equations. Applications of LPC parameters – Pitch detection using LPC parameters, Formant analysis using LPC parameters.

Unit-V: Speech and Speaker Recognition Systems   **(Hours: 07)**

Speaker recognition system-speaker verification system, speaker identification systems. Speech recognition system- isolated digit recognition system, continuous digit recognition system, LPC distance measure.

                                              Total Hours: 45

(19MT26101) ADVANCED COMMUNICATION NETWORKS
(Program Elective-3)

Int. Marks	Ext. Marks	Total Marks		L	T	P	C
40	60	100		3	-	-	3

PRE-REQUISITES:

A Course on Computer Networks and Wireless Communications and Networks at UG Level

COURSE DESCRIPTION:

Advanced communication networks and its architectures; Protocols & Network security; Mobile adhoc networks.

COURSE OBJECTIVES:

CEO1:   To provide advanced knowledge in advanced networks, architectures, protocols and security.
CEO2:   To impart analysis, problem solving, and application skills in advanced computer networks.

COURSE OUTCOMES:

After completion of the course, students should be able to:

CO1.   Analyze Reference architecture models like OSI, TCP/IP, Wired and Wireless LANs in various applications and Compare Datalink protocols.
CO2.   Understand Network layer Protocols, Switching in Networks, ATM and its signaling.
CO3.   Understand the differences between Network, Transport and Application layer protocols.
CO4.   Analyze ciphers and predict the received data from ciphers and Encrypted data using various cryptographic protocols.
CO5.   Analyze various Ad-hoc networks and Wireless sensor networks.

DETAILED SYLLABUS:

Unit-I: Wired and Wireless Networks   (Hours: 10)
Introduction, Reference models- OSI, TCP/IP; Data Link Control Protocols - HDLC, Point to Point Protocol (PPP); Ethernet- Fast Ethernet, Gigabit Ethernet; Wireless LANS – Merits, topologies, Architecture – Physical Layer, MAC Layer, Frame structure, Applications; Virtual LANs.

Unit-II: Advanced Network Architectures   (Hours: 10)
Circuit switching network - SONET/SDH; Virtual Circuit Networks – Frame Relay, ATM - Protocol Architecture, Logical Connections, ATM Cells, Transmission of ATM Cells, ATM Service Categories; Signaling Protocols - MPLS, RSVP; VPN architectures.

Unit-III: Internet Transport and Application Protocols   (Hours: 09)
Internet protocol - IPv6, Transport protocols – Connection Oriented protocol TCP, Connectionless protocol UDP; Congestion control in TCP, Domain Name System, Simple Mail Transfer Protocol, WWW and HTTP, Multimedia Applications – RTP, Voice Over IP.

Unit-IV: Security in Advanced Networks   (Hours: 07)
Network security, Cryptography - Symmetric Key Cryptography, Public Key Cryptography, Simple Network Management Protocol, Firewalls - Packet filtering, Digital Signature, IP Sec.

Unit-V: Mobile Ad-Hoc Networks   **(Hours: 09)**

Overview of Wireless Ad-Hoc Networks, Routing in Ad-Hoc Networks, Routing Protocols for Ad-Hoc Networks; Wireless Sensor Networks: Sensor Networks and Protocol Structures, Communication Energy Model, Clustering Protocols, Routing Protocols.

Total Hours: 45

TEXT BOOKS:

1. Behrouz A. Forouzan, "*Data Communications and Networking*", 4th Ed, Tata McGraw-Hill, New Delhi, 2006.
2. Computer and Communication Networks, Nader F. Mir, Pearson Education,2007.
3. William Stallings, "*Data and Computer Communication*", 9th edition, Prentice hall, 2010.

REFERENCE BOOKS:

1. Jim Kurose, Keith Ross, "*Computer Networking: A Top Down Approach*", 4th edition, Addison Wesley, July 2007.
2. Andrew S. Tanenbaum "*Computer Networks*", 4th Edition, Pearson Education, 2008.

Int. Marks	Ext. Marks	Total Marks		L	T	P	C
40	60	100		3	-	-	3

PREREQUISITES:

A Course on Wireless Communication, Digital Signal Processing and Antennas at UG Level.

COURSE DESCRIPTION:

Principles of software defined radio; Multirate digital filter banks; Analysis and Synthesis of signals performance; Smart antennas with applications.

COURSE OBJECTIVES:

CEO1: To provide advanced knowledge in various aspects of Software Defined Radio.
CEO2: To impart analysis, problem solving, design, simulation, Interdisciplinary, Communication and application skills in Software Defined Radio.
CEO3: To imbibe ethical attitude towards environment and society.

COURSE OUTCOMES:

After successful completion of this course the students will be able to

CO1: Understand Radio frequency Implementation issues in software defined radios.
CO2: Design multirate digital filters for multirate signal processing for digital frequency converters in digital receivers.
CO3: Analyze the performance of direct digital synthesis systems in designing software defined radios.
CO4: Apply appropriate techniques for hardware implementation of smart antennas using software radio for better spectrum exploitation.
CO5: Analyze a Software defined Radio System/ Subsystem with object oriented representation for public needs.

DETAILED SYLLABUS:

Unit-I: Introduction to Software Radio Concepts   (Hours: 09)
The need for Software radios and its definition, Characteristics and benefits of Software radio, Design principles of a software radio.
Radio Frequency Implementation Issues: Purpose of RF front – end, Dynamic range, RF receiver front – end topologies, Enhanced flexibility of the RF chain with software radios, Importance of the components to overall performance, Transmitter architectures and their issues, Noise and distortion in the RF chain, ADC & DAC distortion, Pre-distortion, Flexible RF systems using micro-electromechanical systems.

Unit-II: Multirate Signal Processing in SDR   (Hours: 09)
Sample rate conversion principles, Polyphase filters, Digital filter banks, Timing recovery in digital receivers using multirate digital filters.
Digital Frequency Up-and Down Converters- Introduction- Frequency Converter Fundamentals- Digital NCO- Digital Mixers- Digital Filters- Half band Filters- CIC Filters-Decimation, Interpolation, and Multirate Processing-DUCs - Cascading Digital Converters and Digital Frequency Converters.

Unit-III: Digital Generation of Signals   **(Hours: 09)**

Introduction, Comparison of direct digital synthesis with analog signal synthesis, Approaches to direct digital synthesis, Analysis of spurious signals, Spurious components due to periodic jitter, Band pass signal generation, Performance of direct digital synthesis systems, Hybrid DDS – PLL Systems, Applications of direct digital synthesis, Generation of random sequences, ROM compression techniques.

Unit-IV: Smart Antennas using Software Radio   **(Hours: 09)**

Introduction, Vector channel modeling, Benefits of smart antennas, Structures for beam forming systems, Smart antenna algorithms, Diversity and Space time adaptive signal processing, Algorithms for transmit STAP, Hardware implementation of smart antennas, Array calibration, Digital Hardware Choices-Key hardware elements, DSP processors, FPGAs, Power management issues. Applying Software Radio Principles to Antenna Systems-Smart Antenna Architectures- Optimum Combining/ Adaptive Arrays- DOA Arrays- Beam Forming for CDMA- Downlink Beam Forming.

Unit-V: Object Oriented Representation of Radios and Network   **(Hours: 09)**

Networks, Object –oriented programming, Object brokers, Mobile application environments, Joint Tactical radio system.

Case Studies in Software Radio Design: SPEAK easy, JTRS, Wireless Information transfer system, SDR-3000 digital transceiver subsystem, Spectrum Ware, Brief introduction to Cognitive Networking.

                                                                 Total Hours: 45

TEXT BOOKS:

M. Tech. – II Semester
(19MT26305) INTERNET OF THINGS
(Common to CNIS, CS, SE, DECS and CMS)

Internal Marks	External Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES:

Courses on Computer Networks, Python Programming.

COURSE DESCRIPTION:

Concepts of Domain Specific IoTs, M2M and system management with Netconf-Yang, IoT privacy and security, IoT physical devices, Amazon Web Services for IoT and case studies illustrating IoT design.

COURSE OUTCOMES:

CO1: Understand the concepts of IoT, IoT protocols, privacy and security issues in IoT applications to analyze domain specific IoT's.

CO2: Design solutions through implementing IoT applications on raspberry pi, AWS and develop security solutions to strengthen IoT environment.

DETAILED SYLLABUS:

Unit-I: Concepts of IoT (Hours: 07)
Definition and characteristics of IoT, Physical design of IoT – IoT protocols, Logical design of IoT, IoT enabling technologies, IoT levels and deployment templates.

Unit-II: Domain Specific IoTs & IoT and M2M (Hours: 09)
Domain Specific IoTs: Home automation, Cities, Environment, Energy, Logistics, Agriculture, Industry.
IoT and M2M: Introduction, M2M, Difference between IoT and M2M, SDN and NFV for IoT.

Unit-III: IoT System Management with Netconf-Yang and Developing Internet of Things (Hours: 09)
Need for IoT systems management, Simple Network Management Protocol (SNMP), Network operator requirements, NETCONF-YANG, IoT systems management with NETCONF-YANG.
Developing Internet of Things: Introduction, IoT design methodology.

Unit-IV: IoT Privacy, Security and Vulnerabilities Solutions and IoT Physical Devices (Hours: 11)
Introduction, Vulnerabilities, Security requirements and treat analysis, Use cases and misuse cases, IoT security tomography and layered attacker model, Identity management and establishment, Access control and secure message communication, Security models, Profiles and protocols for IoT.
IoT Physical Devices & Endpoints: What is an IoT device, Exemplary device, About the board, Linux on Raspberry Pi, Raspberry Pi interfaces, Programming Raspberry Pi with Python and other IoT devices.

Unit-V: Amazon Web Services for IoT and Case Studies Illustrating IoT Design
(Hours: 09)

Amazon Web Services for IoT: Amazon EC2, Amazon AutoScaling, Amazon S3, Amazon RDS, Amazon DynamoDB.

Case Studies Illustrating IoT Design: Home automation, Cities, Environment and Agriculture.

Total Hours: 45

TEXT BOOKS:

1. Arshdeep Bahga, Vijay Madisetti, "*Internet of Things: A Hands-on Approach"*, Universities Press, 2015.
2. Raj Kamal, "*Internet of Things: Architecture and Design Principles*", McGraw Hill, 1st Edition, 2017.

REFERENCE BOOKS:

1. Adrian McEwen, Hakim Cassimally, "*Designing the Internet of Things"*, Wiley, 2013.
2. Jeeva Jose, "*Internet of Things"*, Khanna Publishing, 1st Edition, 2018.

M. Tech. - II Semester
(19MT26102) PATTERN RECOGNITION
(Program Elective – 4)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
40	60	100	3	-	-	3

PRE-REQUISITES:

A course on Digital Image processing.

COURSE DESCRIPTION:

Importance of pattern recognition; Baye's Decision Theory; Linear and non linear classifiers; Feature selection based on statistical hypothesis testing; Feature Generation; KL Transform; SVD; ICA; Clustering of features and clustering algorithms.

COURSE OBJECTIVES:

CEO1: To impart Knowledge in fundamentals that helps to develop various algorithms to classify the patterns of the objects.
CEO2: To develop skills in analysis, formulating, problem solving of Features, clustering categories of objects in digital image processing.

COURSE OUTCOMES:

On successful completion of this course the students will be able to

CO1: Understand the importance of pattern recognition, classifiers, supervised & unsupervised and analyze the bayes classifier to solve the unknown probability density function between the patterns.
CO2: Analyze the linear classifier algorithms such as LMS to determine minimum mean square error between the pattern classes using various approaches.
CO3: Analyze the Non-linear classifier algorithms such as back propagation algorithms to determine cost function and to seperate the pattern classes using various approaches.
CO4: Understand the concepts of feature selection and feature generation. Analyze feature selection & generation techniques to determine the features from the image using various techniques.
CO5: Understand the concepts of feature Clustering, Proximity Measures and analyze Clustering Algorithms Such as Sequential Clustering Algorithms, A Modification of BSAS, A Two-Threshold Sequential Scheme. Apply the appropriate techniques to cluster the features of the image.

DETAILED SYLLABUS:

Unit-I: Introduction to Pattern Recognition (Hours: 10)
Importance of pattern recognition, Features, Feature Vectors and Classifiers, Supervised, Unsupervised and Semi Supervised Learning, Classifiers based on Baye's Decision Theory **-** Baye's decision theory, Discriminant Functions and decision surfaces, Bayesian classification for Normal Distributions, Estimation of Unknown probability density functions, The Nearest Neighbor Rule.

Unit-II: Linear Classifiers (Hours: 09)
Linear Discriminant functions and Decision Hyperplanes, The perceptron Algorithm, Least Squares Method- Mean Square Error Estimation, Stochastic Approximation and the LMS Algorithm, Sum of Error Squares Estimation Least Squares Method; Mean Square Estimation Revisited- Mean Square Error Regression; Support Vector Machine**-** Separable classes, Nonseparable classes

Unit-III: Non Linear Classifiers   **(Hours: 09)**

The XOR problem, The two layer perceptron, Three layer perceptrons, The Back propagation Algorithm, The cost function choice, choice of the network size, A simulation example, Networks with weight sharing, generalized linear classifiers, polynomial classifiers, Radial basis Function Networks.

Unit-IV: Feature Selection and Generation   **(Hours: 09)**

Feature Selection- Pre processing, The peaking phenomenon, Feature selection based on statistical hypothesis testing, ROC curve, class separability measures, feature subset selection; Feature Generation - Basis Vectors and Images, The KL Transform, The Singular Value Decomposition, Independent Component Analysis, Non negative Matrix Factorization, Regional features, Features for shape and size characterization.

Unit-V: Clustering   **(Hours: 08)**

Introduction, Types of Features, Definitions of Clustering, Proximity Measures-Proximity Measures between Two Points, Proximity Functions between a Point and a Set, Proximity Functions between Two Sets; Categories of Clustering Algorithms, Sequential Clustering Algorithms, A Modification of BSAS, A Two-Threshold Sequential Scheme, Refinement Stages

                                            Total Hours: 45

TEXT BOOK:

1. Sergios Theodoridis, Konstantinos Koutroumbas, "*Pattern Recognition*", Academic Press, Second Edition, 2009.

REFERENCE BOOKS:

1. Richard Duda, Peter E Hart, David G Stork, "*Pattern Classification*", John Wiley & Sons, Second Edition, 2001.
2. Pattern Recognition and Machine Learning, Christopher M.Bishop, Springer Publications 2006.

M. Tech. – II SEMESTER
(19MT23831) ADVANCED COMMUNICATIONS LAB
(Common to CMS & DECS)

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
50	50	100	-	-	4	2

PRE-REQUISITES:

Simulation lab at UG level

COURSE DESCRIPTION:

Simulation of communication systems over communication channels with and without line coding; Design and simulation of Bussgang Blind channel; Minimum Mean Square Error and zero force equalizer; Adaptive equalizers using LMS and RLS algorithms.

COURSE OBJECTIVES:

CEO1: To design, develop and simulate various components of communication System and adaptive equalizers.
CEO2: To apply knowledge and skills in implementation of engineering principles in the field of Communications.

COURSE OUTCOMES:

After successful completion of the course, students will be able to

CO1: Analyze , measure, interpret and validate the practical observations by applying the conceptual knowledge of digital communications and adaptive signal processing.
CO2: Design CDMA communication system over different channels with Various adaptive equalizers for desired specifications.
CO3: Work individually and in groups to solve problems with effective communication.

LIST OF EXERCISES /EXPERIMENTS:

1. Design and simulation of M-ary QAM system with AWGN fading channel.

2. Simulation of Rayleigh fading channel in the mobile environment.

3. Design and performance evaluation of CDMA communication system over a Gaussian channel.

4. Design and performance evaluation of CDMA communication system over a multipath Rayleigh fading channel.

5. Simulation of communication system using convolutional codes & Viterbi Decoding.

6. Design and simulation of an adaptive equalizer using LMS algorithm.

7. Design and simulation of an adaptive equalizer using RLS algorithm.

8. Design and simulation of communication system using Bussgang Blind channel equalizer.

9. BER evaluation for BPSK modulation system with Minimum Mean Square Error (MMSE) equalization in 3 tap ISI channel.

10. BER evaluation for BPSK modulation system with Zero force Equalization in 3 tap ISI channel.

REFERENCE BOOKS/LABORATORY MANUALS:

1. Advanced communication lab manual of the department.
2. W.H. Tranter, K. Sam Shanmugham, T.S. Rappaport, and K.L. Kosbar, "*Principles of Communication System Simulation with Wireless Applications",* Pearson, 2004.
3. J.G. Proakis, and M. Salehi, "*Contemporary Communication Systems using MATLAB",* cengage learning, *2nd Edition,* 2004.

SOFTWARES/TOOLS USED:
MATLAB with communication and Signal Processing tool boxes.

M. Tech. – II Semester
(19MT26131) IMAGE AND VIDEO PROCESSING LAB

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
50	50	100	-	-	4	2

PRE-REQUISITES:

Courses on Signal and Image Processing

COURSE DESCRIPTION:

Fundamentals of images, image transforms, enhancement, restoration, image compression and coding and video processing.

COURSEOBJECTIVES:

CEO1: To perform various operations on different types of images and videos.

CEO2: To analyze Images using Image processing techniques like Enhancement, Restoration, compression, segmentation and object recognition.

CEO3: To imbibe attitude for lifelong learning for continuous professional growth.

COURSE OUTCOMES:

On successful completion of this course, the students will be able to:

CO1: Apply sampling, quantization, transformation and filtering techniques on image & video.

CO2: Analyze Image enhancement, restoration, segmentation and compression techniques for improving visual quality of image

CO3: Apply transformation techniques on images and video to extract the information embedded in them.

CO4: Work individually and in teams collaboratively in implementing case studies.

LIST OF OF EXERCISES /EXPERIMENTS: (10-12 Exercises/Experiments)

1. Point processing in spatial domain
   a. Negation of an image
   b. Thresholding of an image
   c. Contrast Stretching of an image
2. Geometric transformations.
   a. Image rotation
   b. Scaling
   c. Translation
3. Logical operations on Digital Images
   a. AND
   b. NAND
   c. OR
   d. NOR
   e. NOT
4. Histogram Equalization and Specification
5. Filtering in spatial domain
   a. smoothing
   b. sharpening
6. Filtering in frequency domain
   a. Low pass filter
   b. High pass filter

7. Perform Edge Detection on images using
    a. Prewitt, sobel, Roberts masks
    b. Canny edge detection method.
8. Image compression using transform techniques.
9. Zooming and shrinking operations on images
10. Morphological operations on images
11. Representation of Digital video: Read, Write, View Videos and conversion of videos in different formats.
12. Video to frame and frame to Video conversion.

REFERENCE BOOKS/LABORATORY MANUALS:

1. Rafael C. Gonzalez, Richard E. Woods, "*Digital Image Processing*", 3rd edition, Pearson Education, 2008.
2. A. Murat Tekalp, "*Digital Video Processing*", Prentice-Hall, 1995.

SOFTWARES/TOOLS USED:

1.   MATLAB with image processing and computer vision tool box

M. Tech. – II Semester
(19MT2AC01) STATISTICS WITH R
(Audit Course)
(Common to All M. Tech. Programs)

Internal Marks	External Marks	Total Marks	L	T	P	C
--	--	--	2	-	-	-

PRE-REQUISITES:

A course on Statistics.

COURSE DESCRIPTION:

Concepts of R programming basics, Bivariate and multivariate data, Confidence intervals, Goodness of fit, Analysis of variance.

COURSE OUTCOMES:

After successful completion of the course, students will be able to:

CO1:   Import, manage, manipulate, and structure data files using R programming.
CO2:   Implement models for statistical analysis of a given dataset and visualize the results to identify trends, patterns and outliers in data.

DETAILED SYLLABUS:

Unit-I: INTRODUCTION **(Hours: 05)**
Data, R's command line, Variables, Functions, The workspace, External packages, Data sets, Data vectors, Functions, Numeric summaries, Categorical data.

Unit-II: BIVARIATE AND MULTIVARIATE DATA **(Hours: 07)**
Lists, Data frames, Paired data, Correlation, Trends, Transformations, Bivariate categorical data, Measures of association, Two-way tables, Marginal distributions, Conditional distributions, Graphical summaries, Multivariate data - Data frames, Applying a function over a collection, Using external data, Lattice graphics, Grouping, Statistical transformations.

Unit-III: POPULATIONS **(Hours: 06)**
Populations, Discrete random variables, Random values generation, Sampling, Families of distributions, Central limit theorem, Statistical Inference - Significance tests, Estimation, Confidence intervals, Bayesian analysis.

Unit-IV: CONFIDENCE INTERVALS **(Hours: 06)**
Confidence intervals for a population proportion, *p* - population mean, Other confidence intervals, Confidence intervals for differences, Confidence intervals for the median, Significance test - Significance test for a population proportion, Significance test for the mean (t-tests), Significance tests and confidence intervals, Significance tests for the median.

Unit-V: GOODNESS OF FIT **(Hours: 06)**
The chi-squared goodness-of-fit test, The multinomial distribution, Pearson's χ^2-statistic, chi-squared test of independence and homogeneity, Goodness-of-fit tests for continuous distributions, ANOVA - One-way ANOVA, Using *lm* for ANOVA.

Total Hours: 30

TEXT BOOKS:

1. John Verzani, *Using R for Introductory Statistics*, CRC Press, 2nd Edition, 2014.
2. Sudha G Purohit, Sharad D Gore, Shailaja R Deshmukh, *Statistics Using R*, Narosa Publishing house, 2nd Edition, 2015.

REFERENCE BOOKS:

1. Francisco Juretig, *R Statistics Cookbook*, Packt Publishing, 1st Edition, 2019.
2. Prabhanjan N. Tattar, Suresh Ramaiah, B. G. Manjunath, *A Course in Statistics with R*, Wiley, 2018.

M. Tech. - III Semester
(19MT36131) INTERNSHIP

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
-	100	100	-	-	-	2

PRE-REQUISITES: --

COURSE DESCRIPTION:

Expose students to the industrial environment; Create competent professionals for the industry; sharpen the real time technical / managerial skills required at the job; Gain professional experience and understand engineer's responsibilities and ethics.

COURSE OUTCOMES:

On successful completion of the course, students will be able to

CO1: Develop problem solving skills, critical thinking skills though designing and developing solutions for complex problems.

CO2: Utilize appropriate modern tools and techniques for implementing the proposed solutions.

CO3: Discern various challenges in developing solutions for complex problems, design and conduct experiments to evaluate alternative solutions for the chosen engineering problems.

CO4: Function effectively as an individual and participate well as a team member to build professional network for growth in career.

CO5: Develop communication, enrich professional, interpersonal and technical skills pertaining to the internship experience.

CO6: Utilize real work experiences to explore their interests, career alternatives that will help with future education or employment through and develop professional skills and competencies to engage in lifelong learning.

M. Tech. - III Semester
(19MT36132) PROJECT WORK PHASE-I

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
50	50	100	-	-	20	10

PRE-REQUISITES: --

COURSE DESCRIPTION:

Identification of topic for the project work; Literature survey; Collection of preliminary data; Identification of implementation tools and methodologies; Performing critical study and analysis of the problem identified; submitting a Report.

COURSE OUTCOMES:

On successful completion of the course, the students will be able to

CO1: Apply contextual knowledge to identify specific domain in Communication systems, signal processing and allied areas of discipline.

CO2: Conduct literature review, analyze, cognize and comprehend the extracted information to recognize the current status of research pertinent to the chosen domain.

CO3: Select appropriate tools, techniques and resources for implementation of project work.

CO4: Function effectively as an individual to recognize the opportunities in the chosen domain of interest

CO5: Write and present a technical report/document to present the findings on the chosen problem.

CO6: Engage lifelong learning for development of technical competence in the field of signal processing and Communication systems.

M. Tech. - IV Semester
(19MT46131) PROJECT WORK PHASE-II

Int. Marks	Ext. Marks	Total Marks	L	T	P	C
150	150	300	-	-	32	16

PRE-REQUISITES: --

COURSE DESCRIPTION:

Time and cost analysis; undertaking practical investigations of project work; implementation; analysis of results; validation and report writing.

COURSE OUTCOMES:

On successful completion of this course, the students will be able to

CO1: Design and develop Integrated Circuits/systems/platforms to undertake practical investigations of project work, analyze and interpret results.
CO2: Utilize appropriate tools, techniques and resources for implementation of project work.
CO3: Function effectively as an individual to recognize the opportunities in the chosen domain of interest
CO4: Write and present a technical report/document to present the findings on the chosen problem.
CO5: Engage lifelong learning for development of technical competence in the field of VLSI.
