Introduction

Biometrics is the science of measuring and statistically analyzing biological data. In information technology, biometrics refers to the use of a person's biological characteristics for personal identification and authentication. Fingerprint, iris-scan, retinal-scan, voiceprint, signature, handprint and facial features are some of the most common types of human biometrics.

Digital signal processors (DSPs), which are specially designed single-chip digital microcomputers that process electrical signals generated by electronic sensors (e.g., cameras, fingerprint sensors, microphones, etc.), will help to revolutionize this world of biometrics. The core of the biometric authentication process is made up of image processing and pattern matching or minutiae comparison algorithms. And the programmable DSP, with an architecture well-suited for implementing complex mathematical algorithms, can efficiently address all the processing needs of such a system.

The guest lecture is planned to provide the knowledge towards the application oriented DSP in the field of Bio-metrics. This is the content beyond the syllabus which will support for self-learning and motivate for life-long learning for the student participants.

Theme of the Lecture

Theme of the Lecture includes

- To realize the subject in different perspective.
- To understand the need of DSP in health care industry.
- To know the current trends and needs of the health care industry.
- To get motivated for self-learning towards industrial needs

Program Schedule

Day 1 23/03/ 2019	Title	Venue
11:00 A.M to 01:30 P.M	Role of DSP in Biometric Applications	Dasari Auditorium, Sree Vidyanikethan Engineering College, Tirupati

Invitation

SREE VIDYANIKETHAN ENGINEERING COLLEGE

(Autonomous) Sree Sainath Nagar, Tirupati – 517 102

GUEST LECTURE

on

"Role of DSP in biometric Applications"

(Target Batch: III B. Tech. Students)

Date	:	23 rd March, 2019
Time	:	11:00 A.M.
Venue	:	Dasari Auditorium.

Resource Person

Dr.R.SUDARMANI

Department of ECE, Avinashilingam Institute, Coimbatore

Presentation

Role of DSP in Biometric Applications

The presentation started with Elements of Signal Processing and Systems, Applications, Advantages. The role of biometrics in fingerprint, Signature, Face recognition are explained. It followed by the challenges in designing the biometric system has been discussed. The event ended with awareness towards the E-waste management system and motivated for start-ups with E-waste recycling

The following are the important snap shots for the presentation

Biometric authentication

Biometric authentication will help in enhancing the security infrastructure against some of these threats. After all, physical characteristics are not something that can be lost, forgotten or passed from one person to another. They are extremely hard to forge and a would-be criminal would think twice before committing a crime involving biometrics.

FIGURE 1-1 DSP has revolutionized many areas in science and engineering. A few of these diverse applications are shown here.

Link 1 Biometric

Speech recognition: converting an acoustic signal, captured by a microphone or a telephone, to a set of words.

Interesting fact...!!!

How Finger-Print Works?

Static Mode

In this mode, users write their signature on paper, digitize it through an optical scanner or a camera, and the biometric system recognizes the signature by analyzing its shape. It is also known as "off-line".

Dynamic Mode

In this mode, users write their signature in a digitizing tablet, which acquires the signature in real time. Dynamic recognition is also known as "on-line".

Link 3 & 4 Applications Of Biometrics In Technology

Biometrics in India

- India's national ID program called Aadhaar is the largest biometric database of the world. It is a digital identity of a person assigned for a lifetime.
- It is based on biometric data(fingerprint, iris scan and face photo), along with demographic data (name, age, gender, address, etc.) of a person.

শাংৱাৰ বিহািত বছৰাৰ সাধিকলো भारत सरकार litter and south Seture Ser Konidála Pawarikalyan S/B Edge Seep that 000 a 901 DOB: 02/09/1968 00000 20000 DOSTOR / MALE 000 064 - 500034 **E-Waste**

Electronic waste (or e-waste) is the fastest growing waste stream, and its disposal is a major environmental concern in all parts of the world. More than 50 million tons of e-waste is generated every year with major fraction finding its way to landfills and dumpsites. E-waste comprises as much as 8% of the municipal solid waste stream in rich nations, such as those in GCC. Globally only 15 - 20 percent of e-waste is recycled while the rest is dumped into developing countries. However, in the Middle East, merely 5 percent of e-waste is sent to recycling facilities (which are located in Asia, Africa and South America) while the rest ends up in landfills.
