The main objective of Honours degree in a discipline is to provide additional learning opportunities for academically motivated students and it is an optional feature of the B. Tech. program. In order to earn Honours degree in a discipline, a student has to earn 20 extra credits by studying FIVE advanced courses for 15 credits (by choosing not more than TWO courses in a semester starting from III B.Tech. I Semester) and by carrying out a **mini project** for 5 credits in the concerned branch of Engineering. The Evaluation pattern of theory courses shall be similar to the regular program courses evaluation. Students aspiring for Honours degree must register from III B.Tech I-Semester semester onwards. The Internal Evaluation shall be made by the Project Evaluation Committee (**PEC**) consisting of concerned supervisor and two senior faculty members, on the basis of TWO project reviews on the topic of the mini project. Each review shall be conducted for a maximum of "50" marks. The final internal marks shall be taken as the SUM of marks obtained in the two reviews. The **PEC** is constituted by the Principal on the recommendations of the Head of the Department. The Semester-end examination (Viva-Voce) shall be conducted by a Committee consisting of External examiner (nominated by the Chief Controller of Examinations), HOD and concerned Supervisor. **17. Grades, Semester Grade Point Average and Cumulative Grade Point Average:**

**17.1. Grade System:** After all the components and sub-components of any course (including laboratory courses) are evaluated, the final total marks obtained shall be converted into letter grades on a "10 point scale" as described below.

**Grades Conversion and Grade points Attached**

<b>% of Marks obtained</b>	<b>Grade</b>	<b>Description of Grade</b>	<b>Grade Points (GP)</b>
> = 95	O	Outstanding	10
> = 85 to < 95	S	Superior	9
> = 75 to < 85	A	Excellent	8
> = 65 to < 75	B	Very Good	7
> = 55 to < 65	C	Good	6
> = 45 to < 55	D	Fair	5
> = 40 to < 45	E	Pass	4
< 40	F	Fail	0
Not Appeared	N	Absent	0
<b>For Mandatory Courses</b>			
>=40	P	Satisfactory	-
<40	I	Not Satisfactory	-

**Pass Marks:**

A student shall be declared to have passed theory course, laboratory course, Socially relevant project and project work if he secures minimum of 40% marks in external examination, and a minimum of 40% marks in the sum total of internal evaluation and external examination taken together. 40% of marks in the semester-end examination. Otherwise, he shall be awarded fail grade - 'F' in such a course irrespective of internal marks. 'F' is considered as a fail grade indicating that the student has to pass the Semester-End Examination in that course in future and obtain a grade other than 'F' and 'N' for passing the course.

**For the Mandatory Courses, if the student obtained 40% or more marks, then his performance shall be indicated as "P" (SATISFACTORY), otherwise the performance shall be indicated as "I" (NOT SATISFACTORY) in the grade sheet.**

**17.2. Semester Grade Point Average (SGPA):** SGPA shall be calculated as given below on a "10 point scale" as an index of the student's performance:

$$SGPA = \frac{\sum(C \times GP)}{\sum C}$$

Where "C" denotes the "credits" assigned to the courses undertaken in that semester and "GP" denotes the "grade points" earned by the student in the respective courses.

**Note:** SGPA is calculated only for the candidates who appeared in the semester-end regular examinations in a particular semester:

**17.3. Cumulative Grade Point Average (CGPA):**

The CGPA shall be calculated for a candidate appeared in the Semester-end examinations for all the courses (including Regular & Supplementary) till that semester. The CGPA shall be displayed in the Grade sheet of the Regular Semester-end examinations and also in the consolidated Grade Sheet issued at the end of the program. The CGPA is computed on a 10 point scale as given below:

$$CGPA = \frac{\sum(C \times GP)}{\sum C}$$

where C denotes the credits assigned to courses undertaken up to the end of the Program and GP denotes the grade points earned by the student in the respective courses.

**PRE-REQUISITES:** A course on OOPS through Java.

**COURSE DESCRIPTION:** Hands-on experience on Polymorphism; Inheritance and Interfaces; Exception Handling; Multithreading; Event Handling; Applets, swings.

**COURSE OUTCOMES:** After successful completion of the course, students will be able to:

- CO1. Apply syntactic constructs of the JAVA programming language to solve logic based problems
- CO2. Develop application programs using concepts of object oriented programming.
- CO3. Function effectively as an individual and on teams to solve problems with effective communication.
- CO4. Write and prepare mini project reports/ documents effectively.

**LIST OF EXERCISES:**

- 1            Demonstrate the following programs using command line arguments:
  - A    Write a program that computes the sum of all its integer arguments
  - B    Write a program to input n integers and perform sorting between them.
- 2    A    The Fibonacci sequence is defined by the following rule. The first 2 values in the sequence are 0, 1. Every subsequent value is the sum of the 2 values preceding it. Write a Java program that uses both recursive and non-recursive functions to print the nth value of the Fibonacci sequence?
  - B    Write a program to define a class student with name, registration number and marks for three subjects as instance variables and describe a constructor to initialize them. Also define a method display to print all the values.
- 3    A    Write a program to print the element of an array that has occurred highest number of times.
  - B    Write a program that displays a menu with options 1. Add 2. Sub. Based on the options chosen, read 2 numbers and perform the relevant operation. After performing the operation, the program should ask the user if he wants to continue. If the user presses y or Y, then the program should continue displaying the menu else the program should terminate. [Use Scanner class]
- 4    A    Write a Program to count tokens- number of words and characters in a string.

- B Write and test overloaded methods to find sum of three integers, sum of three double values and sum of four integers.
- 5 A Write a program to create an abstract class named Shape that contains an empty method named number of Sides ( ). Provide three classes named Trapezoid, Triangle and Hexagon such that each one of the classes extends the class Shape. Each one of the classes contains only the method number Of Sides ( ) that shows the number of sides in the given geometrical figures.
- B Write a program that imports the User-defined package P1 and access the member variables and methods of classes that contained in the package P1.
- 6 A University awards some grace marks to students who participate in the Inter University games. Therefore, total marks awarded = Exam\_Marks +Sports\_Grace\_Marks. If total marks scored are greater than maximum marks, then the final marks awarded will be equal to the maximum marks. An Object Oriented based implementation will contain a class called Results, which extends a class called Exam, which itself extends a class called Student. It will also contain an interface called Sports, which is implemented by the Results class. The Results class will be responsible for computing the final marks scored by the students. Write a Java program along with an interactive driver class.
- 7 A Write a program to handle Arithmetic Exception, Array Out of Bounds Exception using try and multiple catch statements.
- B Write a java program to throw a user defined exception called Negative, if the entered input is a negative number.
- 8 A Write a Java program that creates three threads. First thread displays - Good Morning for every one second, the second thread displays - Hello for every two seconds and the third thread displays - Welcome for every three seconds.
- B Write a Java program that correctly implements producer consumer problem using the concept of inter-thread communication.
- 9 A Write a program create a class "Book" with name, id, author, publisher and quantity as instance variables and a constructor to initialize them. Create a HashSet object of type Book and three Book instances b1, b2 and b3. Add these instances into HashSet and display them.
- B Develop an Applet that receives an integer in one text field, and computes its factorial value and returns it in another text field, when the button named "Compute" is clicked.
- 10 A Write a program that creates a user interface to perform integer divisions. The user enters two numbers in the text fields Num1 and Num2. The division of Num1 and Num2 is displayed in the Result field when the Divide button is clicked. If Num1 or Num2 were not an integer, the program would throw a Number Form at Exception. If Num2 were Zero, the program would throw an Arithmetic Exception Display the exception in a message dialog box.
- B Write a java program that simulates a traffic light. The program lets the user select one of three lights: red, yellow, or green. When a radio button is selected, the light is turned on, and only one light can be on at a time No light is on when the program starts.

- 11 Write a java program that handles all mouse and key events and shows the event name at the center of the window when mouse event is fired (Use Adapter classes).

**Mini Project 1:**

Given coordinates of the box, radius of the circle and color, using these elements design an animation of a bouncing ball using Java applet program.

**Mini Project 2:**

Design and implement a simple Inventory Control System for a small Video Rental Store using appropriate User-Interface. Define the following classes: **Video** to model a video and **VideoStore** to model the actual store. Assume following are the attributes of the class **Video**: title, user\_rating, a flag to say whether it is checked out or not and define required member methods. The **VideoStore** class will contain an instance variables that refers an array of videos (say of length 10) and the following member functions: add Video(String), checkout(String), return Video(String), receive Rating(String) and list Inventory(). Finally create a **VideoStore Launcher** class with a main method which will test the functionality.
