

**DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING**

Guest Lecture on "Bird Watching and Wildlife  
Photography-Vihangam" on (22.02.2022)

**REPORT**

The Department of ECE in association with Bird watching Club, Tirupathi has conducted a Guest lecture on Bird Watching and Wildlife Photography on 22.02.2022. The target audience are the students of I B.Tech of Sree Vidyanikethan Engineering College. Students were enlightened with enthusiasm and passion towards biodiversity, environmental protection and wildlife conservation. The speaker has delivered many new things in bird watching. Some of the points are: Bird watching or birding is an observation of birds and is a recreational activity of many. "Bird watching is not only an observation of the movements of the birds mechanically with binoculars or still/video cameras, but it's a way of connecting with nature. This initiative can create awareness among the students, which will, in turn, inculcate the passion conserving nature among youngsters. The speaker has given information about the rules and precautions to be taken while going for bird watching and photography. Students have interacted with the speaker about the risks of bird watching visit and what are the factors to be considered while choosing a camera. The speaker has presented video with all his achievements and photographs of the rare birds he captured in Seshachalam forest.
