## **DEPARTMENT OF MECHANICAL ENGINEERING**

## **Report On Guest Lecture on**

"Innovation Techniques"

04<sup>th</sup> JUNE 2022

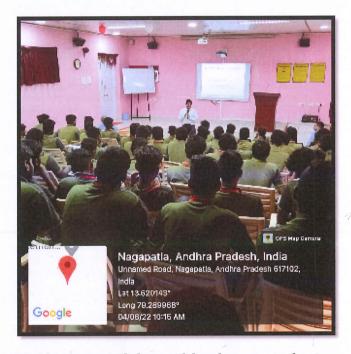

## Dr D Krishna Mohan Raju delivering Lecture

Innovation refers to creating more effective processes, products, and ideas. It can also increase the likelihood of our project succeeding and can create more efficient processes that can result in better productivity and performance.

Innovation is important to the advancement of society as it solves these kinds of social problems and enhances society's capacity to act. It's responsible for resolving collective problems in a sustainable and efficient way, usually with new technology and quickly responding to the external challenges by developing human as well as technological resources to do things differently.

Innovation in education encourages teachers and students to explore, research and use all the tools to uncover something new. It involves a different way of looking at problems and solving them. The thinking process that goes into it will help students develop their creativity and their problem solving skills.

With this objective, an online seminar on "Innovation Techniques" was organized in the department on 4th June 2022. Dr D Krishna Mohan Raju Professor, Department of Mechanical Engineering AITS, Rajam peta. India was the resource person. The program started with the felicitation to the speaker **Dr D Krishna Mohan Raju**.

Students participated in the guest lecture

Dr D Krishna Mohan Raju presented a lecture on "Innovation Techniques" in which he explained the importance of innovation, How does innovation contribute to success, What is the importance of innovation in education.
